

WEBVTT

1

00:00:00.000 --> 00:00:07.109

Caroline Herrick: While because we have some people working here and I think they're getting ready to leave but they're making noise in the background so

2

00:00:07.350 --> 00:00:08.970

Kevin Magee: A lot of background Carolyn.

3

00:00:09.150 --> 00:00:09.570

Yeah.

4

00:00:11.340 --> 00:00:12.300

Kathy: We're all in this

5

00:00:14.519 --> 00:00:14.940

Kevin Magee: Thing.

6

00:00:17.340 --> 00:00:28.710

Kevin Magee: To complicate things by I had nerds to go here, they were supposed to fix my printer to connect with the computer and it's still not fixed side, so I don't have an agenda. So for this.

7

00:00:29.460 --> 00:00:37.260

Kevin Magee: Health, have you helped me Kevin with the agenda. So we start with a minute. So the last meeting. Are there any additions or corrections to

8

00:00:43.500 --> 00:00:45.060

john cunningham: Make a motion to approve the minutes.

9

00:00:46.230 --> 00:00:47.640

Kevin Magee: Now I can hear people

10

00:00:49.230 --> 00:00:50.670

john cunningham: Surely, can you hear me or not.

11

00:00:52.110 --> 00:00:53.010

Kevin Magee: Now I can hear you.

12

00:00:54.120 --> 00:00:56.100

john cunningham: But I'm gonna make a motion to approve the minutes.

13

00:01:01.620 --> 00:01:02.430

Kevin Magee: Seconded that

14

00:01:03.510 --> 00:01:05.040

Kevin Magee: Any additions for correction.

15

00:01:10.080 --> 00:01:12.510

Kevin Magee: As recorded. All in favor.

16

00:01:15.390 --> 00:01:16.740

Kevin Magee: Okay, moving on.

17

00:01:19.200 --> 00:01:19.590

Kevin Magee: Kevin

18

00:01:25.650 --> 00:01:26.430

Kevin Magee: tree planting.

19

00:01:32.550 --> 00:01:33.600

Kevin Magee: So I took a

20

00:01:35.610 --> 00:01:37.710

Kevin Magee: Ride today this afternoon.

21

00:01:39.600 --> 00:01:43.260

Kevin Magee: For possible location for plantings.

22

00:01:45.960 --> 00:01:49.350

Kevin Magee: Looks like there are some spots on your street.

23

00:01:50.580 --> 00:02:00.900

Kevin Magee: 64 years three, there's a spot there. But there's wires on that side. The road potential spot in front of 47 fear Street.

24

00:02:02.700 --> 00:02:03.480

Kevin Magee: And then

25

00:02:04.650 --> 00:02:12.240

Kevin Magee: 53 Broad Street that we took it down a tree is damaged or in front of from a storm there and there's a tree in front of that house again.

26

00:02:13.860 --> 00:02:17.700

Kevin Magee: But it has power wires there but down the street. I believe there's

27

00:02:19.290 --> 00:02:27.600

Kevin Magee: Cherries or crab. I'm not sure which one but along that road. We can fight, keep it in the same keeping their crack the crabs.

28

00:02:30.150 --> 00:02:36.030

Kevin Magee: And then there's some several spots on State Street above route one between one and North Street.

29

00:02:37.500 --> 00:02:46.980

Kevin Magee: We also can take a look at North street itself between Church and north. The narrow pointing strip or they might be able to be room for something there.

30

00:02:50.130 --> 00:02:50.430

Kevin Magee: On

31

00:02:53.670 --> 00:03:02.880

Kevin Magee: State Street itself below right one, that first house after one there might be another spot. This is on the heading south again be on the right side there.

32

00:03:05.070 --> 00:03:17.400

Kevin Magee: And also at to State Street. That's where we have the tree to remove and a lot of work in there, but we potentially could be replanting in the air. If we do something with those roots.

33

00:03:18.480 --> 00:03:19.560

Kevin Magee: For that house. They are

34

00:03:21.780 --> 00:03:23.010

Kevin Magee: On the green, there's

35

00:03:25.200 --> 00:03:35.730

Kevin Magee: What we talked about two locations on top of the green for that Norway maple that got removed us from the Catholic Church were Norway Maple or were

36

00:03:37.110 --> 00:03:42.330

Kevin Magee: Sugar me a book came down and getting from a store and also

37

00:03:43.950 --> 00:03:48.540

Kevin Magee: For a town hall over the weekend, somebody ran over one of our trees. So there's this

38

00:03:49.590 --> 00:03:50.610

Spot there.

39

00:03:52.950 --> 00:04:00.120

Kevin Magee: Now, I noticed it Monday afternoon and then talk to the park and Rec. I thought maybe something back to over doing some work on the

40

00:04:01.320 --> 00:04:03.660

Kevin Magee: Christmas tree there and they have no knowledge of it.

41

00:04:05.550 --> 00:04:10.050

Kevin Magee: That's a new planting that we had that was kind of private funding that paid for that tree.

42

00:04:14.970 --> 00:04:25.650

Kevin Magee: That was the one that was most be a memory for I can't remember the guys name there, but we're putting doing another tree for him where he wants to observe the painting for like a tree.

43

00:04:26.370 --> 00:04:28.830

Kevin Magee: Tree. So I think it's a cursed tree.

44

00:04:31.080 --> 00:04:33.270

Kevin Magee: So this is going to be on so

45

00:04:35.700 --> 00:04:36.630

Kevin Magee: We'll have to figure out

46

00:04:37.950 --> 00:04:41.850

Kevin Magee: What's going to happen with that location of this cursed tree. Now,

47

00:04:43.140 --> 00:04:53.250

Kevin Magee: There are some there's two locations on Whitfield Street, we're moving trees were potentially at some point time trees can be replanted that's in front of 188 Whitfield Street.

48

00:04:54.570 --> 00:05:00.660

Kevin Magee: There seems to be an opening in front of 176 Whitfield street somewhat narrow spacing, though.

49

00:05:02.820 --> 00:05:04.230

Kevin Magee: The planting strip there.

50

00:05:05.310 --> 00:05:13.050

Kevin Magee: 142 Whitfield Street. There's a tree that posted for removal and then 138 with your three. I think we took it down a tree. A couple years ago.

51

00:05:14.220 --> 00:05:30.690

Kevin Magee: From that residents also looking at to true moves on grace AVENUE IN THE AREA 41 grace Avenue. That's also an arrow pointing area there so potential spots, say, which kind of need to look at and determine what we want to

52

00:05:32.940 --> 00:05:35.670

Kevin Magee: Put into these locations. I'm not sure what we have

53

00:05:37.020 --> 00:05:44.610

Kevin Magee: Available for a number of trees for the spring outside get to places we have places we just need to find out what

54

00:05:45.690 --> 00:05:49.650

Kevin Magee: We have available for funding from the Garden Club.

55

00:05:51.330 --> 00:05:54.090

Kevin Magee: Remember, we had a \$500 donation for

56

00:05:58.710 --> 00:06:01.530

Kevin Magee: The one that's going to be placed the one in front of St George's

57

00:06:05.820 --> 00:06:07.410

Kevin Magee: Did you get that \$500

58

00:06:09.870 --> 00:06:10.620

Kevin Magee: No.

59

00:06:24.510 --> 00:06:25.050

Kevin Magee: Yo,

60

00:06:28.440 --> 00:06:29.160

Kevin Magee: A month ago.

61

00:06:30.390 --> 00:06:37.530

Kathy: I thought will said that he sent the money to you right after the Design Review Committee meeting where they decided to do this.

62

00:06:38.130 --> 00:06:39.720

Kevin Magee: You're right I gave it to Daddy.

63

00:06:41.550 --> 00:06:42.060

Dottie: Oh,

64

00:06:45.510 --> 00:06:47.460

Kevin Magee: And know that that it was to be

65

00:06:48.690 --> 00:06:52.980

Kevin Magee: planted in the spring and for home that was planted in who gave the money.

66

00:06:55.530 --> 00:07:05.610

Dottie: Yeah, so you I do remember it. Um, I have the record of receiving the 500 and they were sent out that we sent out letters.

67

00:07:07.650 --> 00:07:10.410

Dottie: Of appreciation to honor

68

00:07:11.430 --> 00:07:12.030

Kevin Magee: Other funny.

69

00:07:13.440 --> 00:07:13.920

Kevin Magee: You know,

70

00:07:15.630 --> 00:07:22.980

Dottie: Oh, with that 500 and then we have 15 more a 13,653 49

71

00:07:24.360 --> 00:07:27.540

Kevin Magee: That should play pay for out in a trees.

72

00:07:30.420 --> 00:07:32.130

Dottie: Well, we don't want to spend it all.

73

00:07:35.430 --> 00:07:37.530

Kevin Magee: Entries with the 5000

74

00:07:37.980 --> 00:07:42.570

Dottie: Yeah, I think that would be probably a good way to go right now.

75

00:07:49.170 --> 00:07:50.520

Kevin Magee: Kevin talking about

76

00:07:52.500 --> 00:08:04.320

john cunningham: Really, I don't think we have to do all the areas in one season, and I don't think the Garden Club is going to want to spend 10,000 of the \$13,000 budget, but that's their decision I think five is plenty

77

00:08:05.850 --> 00:08:06.480

john cunningham: For the spring.

78

00:08:09.060 --> 00:08:10.110

Kevin Magee: Give a century.

79

00:08:12.240 --> 00:08:13.830

Kevin Magee: Um, I

80

00:08:14.040 --> 00:08:19.860

john cunningham: spent five and we have the donation from the Design Review that would be 1011 truth.

81

00:08:20.730 --> 00:08:26.370

Kevin Magee: Okay. And then we have the two other donations. So there's already the reasons for two other trees on the green there also.

82

00:08:27.780 --> 00:08:29.040

Kevin Magee: So 30

83

00:08:29.430 --> 00:08:30.120

Your team.

84

00:08:32.940 --> 00:08:41.910

Kevin Magee: Oh, maybe Sharon and John should decide where the trees are needed, where it makes for more of a coherent plan.

85

00:08:43.980 --> 00:08:55.470

Shavaun Towers: I can do a tour around and just see where I think they'll have the greatest impact. I'm quite sure that they'd be helpful everywhere, but some will make more difference than others.

86

00:08:55.950 --> 00:08:57.240

Kevin Magee: But that's a lot of trees.

87

00:08:58.770 --> 00:09:00.300

Kevin Magee: Or 14 trees.

88

00:09:02.190 --> 00:09:04.500

Kevin Magee: Kevin kid gave you the list of trees.

89

00:09:05.700 --> 00:09:06.330

Kevin Magee: Chosen

90

00:09:08.250 --> 00:09:11.430

Kevin Magee: These are just open spots there I can. I'll email them out there. You guys can

91

00:09:13.560 --> 00:09:15.420

Kevin Magee: Also, I mean, don't be limited to that.

92

00:09:17.280 --> 00:09:18.000

Dottie: I am

93

00:09:18.750 --> 00:09:18.990

Oh,

94

00:09:20.490 --> 00:09:21.090

Dottie: I'd like to

95

00:09:22.680 --> 00:09:23.910

Dottie: I'm sorry, surely go

96

00:09:24.870 --> 00:09:28.080

Kevin Magee: Oh, I said we should plan on trees.

97

00:09:29.670 --> 00:09:30.750

Kevin Magee: That are lucky number

98

00:09:33.810 --> 00:09:37.980

Kevin Magee: 13 is born on the 13th.

99

00:09:38.160 --> 00:09:38.820

Oh,

100

00:09:41.100 --> 00:09:42.120

Kevin Magee: That explains something

101

00:09:47.220 --> 00:10:01.620

Dottie: Um, no. Just one thing I wanted to ask is, if we have the speaker. You remember Kathleen Connelly came and spoke at the garden club and she did mention a winter tree Hawthorne

102

00:10:02.400 --> 00:10:18.870

Dottie: Which she felt was good to put in as a treat as a street side tree. It's just her feeling her. She's a landscape design horticulture consultant, blah, blah, blah. But anyway, so I just thought I'd bring it up as a recommendation.

103

00:10:20.100 --> 00:10:20.790

Kevin Magee: And what do you think

104

00:10:21.840 --> 00:10:22.260

Kevin Magee: John

105

00:10:22.440 --> 00:10:28.230

Shavaun Towers: Well, I'll let john way and as a you'd have to have the formulas for it.

106

00:10:30.180 --> 00:10:34.200

Shavaun Towers: I'm very fond of them myself. But they are prone to disease.

107

00:10:36.000 --> 00:10:41.490

john cunningham: I'm guessing, just to correct the terminology. I think she meant Washington Hawthorne not winter who are

108

00:10:41.490 --> 00:10:44.430

Dottie: Fun that could be. That's my note.

109

00:10:44.880 --> 00:10:52.380

john cunningham: To bond is right. There's a bunch of different varieties. I've used quite a bit. It's, it's, it's a little bit hard to find in the trade.

110

00:10:55.290 --> 00:10:59.310

john cunningham: Just first guess it's wider than it is tall.

111

00:11:00.390 --> 00:11:10.770

john cunningham: So if it's going to be 15 feet wide of maturity without pruning a tree. The tree could be 20 feet wide. So you in the street trees.

112

00:11:11.670 --> 00:11:23.010

john cunningham: I think it's I think it's more advantageous to have a branch structure that's a vase shape that the highest part is going to be over the sidewalk, as opposed to coming out from the tree. I think that's

113

00:11:23.760 --> 00:11:28.830

john cunningham: Just my first go around, but I do like often if we have an area that has some space to it.

114

00:11:31.020 --> 00:11:39.240

john cunningham: It's a nice tree sure Vons right it does have a little bit more, if I remember correctly, little bit more disease susceptibility to some other boys.

115

00:11:40.470 --> 00:11:44.580

Kevin Magee: Would this be a tree, my property to the green or Park setting it, I think.

116

00:11:45.810 --> 00:11:51.240

Shavaun Towers: Yeah, a park setting, I think, I think it is an alternative host for

117

00:11:52.710 --> 00:11:55.230

Shavaun Towers: The cedar apple rust.

118

00:11:56.670 --> 00:12:03.000

Shavaun Towers: So we need to be a little mindful of what's around it. It is gorgeous tree, and it is

119

00:12:03.000 --> 00:12:04.830

Shavaun Towers: Multi seasonal

120

00:12:06.150 --> 00:12:10.320

Shavaun Towers: But I agree that the shape is probably the bigger issue.

121

00:12:10.620 --> 00:12:11.040

Hmm.

122

00:12:13.080 --> 00:12:27.720

Dottie: Well, that's interesting. The only reason why I brought it up, was because she felt it would be a good tree side a street side tree and I don't think it is. So yeah do with it whatever you want. That's the only reason why I did it.

123

00:12:27.810 --> 00:12:30.120

Shavaun Towers: Yesterday, because it doesn't get planted enough

124

00:12:31.140 --> 00:12:44.070

Shavaun Towers: John's right it's it's hard to find in the trade in part because it does have some disease issues. And yeah, people are leery of it. Um, but if we found one. There are certain places where we could be using

125

00:12:44.070 --> 00:12:44.490

john cunningham: It so

126

00:12:44.760 --> 00:12:45.930

Shavaun Towers: You had a list.

127

00:12:48.090 --> 00:12:49.350

Kevin Magee: That in the back of your mind.

128

00:12:49.890 --> 00:12:50.160

Yeah.

129

00:12:51.180 --> 00:12:51.570

Okay.

130

00:12:55.680 --> 00:12:58.770

Kevin Magee: So next on our list of things is a

131

00:13:01.320 --> 00:13:06.510

Kevin Magee: High Street tree work. Oh yeah, how's that going, I'm

132

00:13:08.550 --> 00:13:17.010

Kevin Magee: I'm got a note and waiting to hear back from Eric barbarous Jenna to meet with her out there to

133

00:13:18.480 --> 00:13:19.290

Kevin Magee: See what we

134

00:13:20.790 --> 00:13:24.450

Kevin Magee: Can do about the trees within the wires there.

135

00:13:25.620 --> 00:13:35.070

john cunningham: If that's something we're early. I made it. I made a quick list. I went I was over at 66 High Street. So I went down and spent a little time and you know 10 minutes on high street.

136

00:13:35.910 --> 00:13:47.880

john cunningham: On if you're driving down High Street from 66 high on the left hand side is where the wires are unfortunately almost all the trees on that side of the street or Norway may

137

00:13:48.750 --> 00:13:49.080

Have

138

00:13:50.190 --> 00:13:58.410

john cunningham: They're just almost all Norway maple and they were planted way too close together when they were planted some of the trees are 12 feet apart.

139

00:13:59.610 --> 00:14:12.810

john cunningham: So it's just from a professional standpoint. I'm not saying to take them all down because I think the people in the street, would I don't think that would be right, but I do think selective removal on the wire side of that street.

140

00:14:14.160 --> 00:14:27.210

john cunningham: Is going to help everything like on number I didn't list everything out. I think it's number 43 or 27. There are three Norway maples in like a 35 foot area.

141

00:14:28.590 --> 00:14:33.180

john cunningham: So to me, that makes no sense. It's only going downhill from here.

142

00:14:34.410 --> 00:14:47.310

john cunningham: Meaning the removal of trees will help the tree. You're going to leave and hopefully the ever source people that Kevin's going to meet with could find a way to maybe open up the middle of the trees and the trees are directly

143

00:14:48.600 --> 00:14:49.890

john cunningham: Below the wires.

144

00:14:53.070 --> 00:15:01.020

john cunningham: There are a couple trees just should come down. Anyway, there's a red. But at the very beginning in the left hand side. It's got one live branch, it should come down.

145

00:15:02.220 --> 00:15:11.460

john cunningham: Someone planted a frank linear up at the end of the street. I like Franklin, do they don't they don't do much. But the thing is, have dead. Take it down.

146

00:15:12.330 --> 00:15:12.840

So,

147

00:15:14.520 --> 00:15:16.890

Kevin Magee: Where's that if I will feel streetside

148

00:15:17.610 --> 00:15:17.970

Yeah.

149

00:15:19.770 --> 00:15:27.570

Kevin Magee: Yeah, let's say they would do well there. And I think blooming, but either two or one left.

150

00:15:28.320 --> 00:15:34.020

john cunningham: There's just one left. It's half dead and it just makes your mom, you can chime in. It's not a street tree.

151

00:15:34.260 --> 00:15:37.230

john cunningham: No small garden tree that would be

152

00:15:37.440 --> 00:15:39.180

john cunningham: Great in the backdrop

153

00:15:40.470 --> 00:15:42.840

john cunningham: But it's, it's not a tree that should be in that street.

154

00:15:44.340 --> 00:15:44.850

Kevin Magee: Okay.

155

00:15:44.880 --> 00:15:53.580

john cunningham: So I'm just going to make a suggestion Kevin and I can meet out there shirvani anyone's more than welcome to go, but we could tag the trees that we think

156

00:15:54.480 --> 00:16:03.150

john cunningham: Probably are the most are in the worst condition on the side of the street with the wires and maybe make some suggestions to remove some of them.

157

00:16:04.410 --> 00:16:04.860

john cunningham: And then

158

00:16:05.040 --> 00:16:16.260

john cunningham: I just me. I would probably meet with the owners on high street before you to tag something to make sure they were still with us on on trying to get a little bit more light in there.

159

00:16:17.400 --> 00:16:19.740

Kevin Magee: I think it's key to meet with the owner so that

160

00:16:21.060 --> 00:16:22.680

Kevin Magee: They don't get shocked that

161

00:16:22.710 --> 00:16:24.210

john cunningham: Correct. Yep.

162

00:16:27.270 --> 00:16:30.690

john cunningham: One other thing on the other side of the street, no wires.

163

00:16:31.980 --> 00:16:34.890

john cunningham: There, there are a lot of Elam on the other side.

164

00:16:35.790 --> 00:16:40.410

john cunningham: Oh, so which is good because the elements of big grower

165

00:16:40.860 --> 00:16:44.550

john cunningham: And looked in good shape and the album will give you the canopy.

166

00:16:44.970 --> 00:16:50.580

john cunningham: That you'd like to have on the street, you don't necessarily have to have two canopy trees on either side of the street.

167

00:16:50.760 --> 00:17:00.900

john cunningham: You can on both sides, but they have to have some variation on either side of the street, they can't both be directly across the street from each other. It would have to be

168

00:17:01.350 --> 00:17:02.220

john cunningham: Separated

169

00:17:02.820 --> 00:17:08.850

john cunningham: You know, but with the wires on the other side, there really shouldn't be any shade trees underneath the wires.

170

00:17:09.600 --> 00:17:14.190

john cunningham: I don't know who was in charge of the tree planting years ago, but I mean there's some real problems with high street.

171

00:17:17.550 --> 00:17:20.490

Kevin Magee: Planet 2530 years ago.

172

00:17:24.270 --> 00:17:35.520

john cunningham: Well, the Norway maples, probably one of the most aggressive growers, surely, so they're going to have a growth rate that's probably a higher than or faster than some of the other trees.

173

00:17:36.060 --> 00:17:37.650

john cunningham: Doesn't matter when they were planted.

174

00:17:38.310 --> 00:17:45.420

john cunningham: I'm just saying that moving forward, I would probably eliminate on high before you do any future plans.

175

00:17:47.670 --> 00:17:53.790

Kevin Magee: Okay, I agree, but you do need to have that meeting with the residents before anything's taken down.

176

00:17:55.080 --> 00:17:58.110

john cunningham: I'm not gonna make a motion. Surely that we have the meeting at your

177

00:17:58.110 --> 00:18:04.080

john cunningham: Apartment because you had a nice apartment and we can all meet up there and discuss the tag trees, if that's okay.

178

00:18:04.770 --> 00:18:09.150

Kevin Magee: Well, um, well first figure out what we need for mobile first Nemo long

179

00:18:10.590 --> 00:18:12.090

Kevin Magee: As they're probably, probably

180

00:18:12.120 --> 00:18:13.140

john cunningham: That's the best way to do it.

181

00:18:13.200 --> 00:18:22.830

Kevin Magee: Okay. JOHN know we set up with like it ever Jennifer never source there to kind of walked around together. Yeah, yeah, if, if

182

00:18:22.890 --> 00:18:35.160

john cunningham: Kevin, if you gave me some advance notice if you were meeting with the ever source person. I would love to be there because that would kill two birds with one stone. We can walk down, see what they would, they would suggest for pruning.

183

00:18:35.700 --> 00:18:42.480

john cunningham: And they are also going to make a suggestion, probably to clear cut. So that might make our, our suggestions on that side of the road a lot clearer.

184

00:18:42.810 --> 00:18:51.810

Kevin Magee: Yeah, my, my thoughts with them and they'll probably recommend remove all those and then potentially looking at putting back in smaller

185

00:18:52.290 --> 00:19:02.940

Kevin Magee: Trees appropriate for their because they're my view it. There were so in those trees are so entangled on those wires. If they trim them, you're gonna end up with this big either base our

186

00:19:04.170 --> 00:19:07.230

Kevin Magee: Wine glass type shape in the middle of the wires there.

187

00:19:07.770 --> 00:19:17.910

john cunningham: You know about it just may not, I'd be hard pressed to say you take down all the Norway made at one time because they think that people would freak out. But if there was a specific Norway maple.

188

00:19:18.480 --> 00:19:32.190

john cunningham: That was left that on the other side of the street. There wasn't any mature trees that might help in the transition for the canopies, you know, moving forward, and we can. I'm sure we can figure it out. It's not a long stretch

189

00:19:32.400 --> 00:19:33.870

john cunningham: Know it's a short show

190

00:19:35.250 --> 00:19:38.790

Shavaun Towers: Me. Maybe we take down a few more than we would, but we

191

00:19:39.690 --> 00:19:42.720

Shavaun Towers: Take by starting the planting.

192

00:19:43.050 --> 00:19:45.330

Shavaun Towers: As we're taking down so

193

00:19:45.480 --> 00:19:51.360

Shavaun Towers: Non removals this year and will plant sometime in the future. Maybe we take more out but we

194

00:19:51.360 --> 00:19:54.300

Shavaun Towers: Do the first phase of planting this year.

195

00:19:55.020 --> 00:19:55.440

Huh.

196

00:19:56.550 --> 00:19:58.740

Shavaun Towers: Man, that may make people feel better.

197

00:19:59.760 --> 00:20:01.560

Kevin Magee: Sounds like a good plan to be

198

00:20:03.030 --> 00:20:10.380

Kevin Magee: under the bus. She decided where the tree should go there. I don't think she planted in Norway maple, she was going to

199

00:20:14.790 --> 00:20:22.860

john cunningham: Get to the bottom. And surely, we're going to get to the bottom, or we're gonna have Leslie, come on to next month's zoom meeting and she's going to tell us where the real answers came from. Okay.

200

00:20:24.090 --> 00:20:26.580

Kevin Magee: Well, first them sooner tree.

201

00:20:30.930 --> 00:20:32.160

Kevin Magee: was planted tonight.

202

00:20:36.510 --> 00:20:42.960

Kevin Magee: File Kevin has to have some mother. Let's go back to the 90s here. Yes, that's the list.

203

00:20:46.170 --> 00:20:47.460

Kevin Magee: Okay, moving on.

204

00:20:51.060 --> 00:20:54.690

Kevin Magee: Next on the list is ever source.

205

00:20:55.920 --> 00:20:57.060

Kevin Magee: Tree work update

206

00:20:58.680 --> 00:21:05.070

Kevin Magee: They're gonna try again. Jenna, come on tonight. She's actually they're caught up with goodbye and she went to go into detail of their

207

00:21:06.300 --> 00:21:08.280

Kevin Magee: Proposed pretty methods.

208

00:21:09.750 --> 00:21:19.650

Kevin Magee: In town here good looking to try and do some more aggressive cutting and stuff. Fortunately, they're caught up with pure hearings regarding the storms.

209

00:21:20.760 --> 00:21:22.950

Kevin Magee: So she wasn't available today, but will

210

00:21:24.600 --> 00:21:28.320

Kevin Magee: She'll be she'll like to join us on an upcoming meeting when we meet again.

211

00:21:29.460 --> 00:21:33.030

Kevin Magee: But I do have a map here which I like to share with you guys.

212

00:21:40.350 --> 00:21:41.190

Kevin Magee: Is there a map on

213

00:21:42.570 --> 00:21:47.340

Kevin Magee: Yes. Yeah, I've actually I've double screens here. So I'm not sure what screen took such I'm asking

214

00:21:48.600 --> 00:21:50.190

Kevin Magee: So as you can see the

215

00:21:52.440 --> 00:21:55.050

Kevin Magee: The area that we're looking at doing the road john really highlighted.

216

00:21:56.370 --> 00:22:09.930

Kevin Magee: But looking at this tell look like they're pretty much look like they're trying to do trimming on on State Street little mental road, all the way up to who Paul

217

00:22:11.580 --> 00:22:17.910

Kevin Magee: Including up, then what's up to 80 I'm look like not planes road.

218

00:22:19.320 --> 00:22:21.000

Kevin Magee: And North mass and wrote area.

219

00:22:23.490 --> 00:22:24.150

Kevin Magee: And

220

00:22:26.010 --> 00:22:27.180

Kevin Magee: Who Paul road.

221

00:22:29.550 --> 00:22:30.570

Kevin Magee: Heart road.

222

00:22:32.970 --> 00:22:33.450

Kevin Magee: North

223

00:22:34.770 --> 00:22:35.220

Kevin Magee: Would

224

00:22:39.270 --> 00:22:45.240

Kevin Magee: Jump Northwood there and Mike drive and looks like a section of

225

00:22:46.770 --> 00:22:47.610

Kevin Magee: Great Hill Road.

226

00:22:49.440 --> 00:22:53.160

Kevin Magee: northern section a great help road and cooks cooks line.

227

00:22:56.340 --> 00:22:56.910

Kevin Magee: So they got

228

00:22:59.820 --> 00:23:03.210

Kevin Magee: Me back out of this year. So they're looking at doing

229

00:23:05.040 --> 00:23:07.800

Kevin Magee: 43 miles of standard maintenance trimming.

230

00:23:09.720 --> 00:23:11.280

Kevin Magee: Which I believe is the

231

00:23:13.170 --> 00:23:14.520

Kevin Magee: Blue color hair.

232

00:23:16.440 --> 00:23:17.490

Kevin Magee: And then

233

00:23:19.440 --> 00:23:24.780

Kevin Magee: Nine miles of backbone trimming that's cutting

234

00:23:26.340 --> 00:23:33.240

Kevin Magee: The main trunk lines and that's usually the me TT cutting

235

00:23:34.920 --> 00:23:41.370

Kevin Magee: Which is the above the wires that 20 feet and

236

00:23:43.560 --> 00:23:45.120

Kevin Magee: Sites side cutting the rest of the

237

00:23:46.500 --> 00:23:55.470

Kevin Magee: Those trees. But if it's since it's made its kind of their basic cutting back to work, calm that's already previously been cut so it's

238

00:23:56.550 --> 00:24:06.420

Kevin Magee: And they basically cut this about three or four years ago. So it's pretty much like one inch diameter potentially up to two inch diameter week growth that they're

239

00:24:08.190 --> 00:24:13.440

Kevin Magee: Planning and doing here, red line. Yeah. The red line would be the

240

00:24:15.000 --> 00:24:17.130

Kevin Magee: To have year cutting

241

00:24:20.730 --> 00:24:24.480

Kevin Magee: So a lot of that day gig. So years ago. So it's not really that much.

242

00:24:27.210 --> 00:24:27.690

Kevin Magee: Of a

243

00:24:31.650 --> 00:24:33.330

Kevin Magee: Difference within the tree itself.

244

00:24:36.480 --> 00:24:41.490

Kevin Magee: Know if you're hacking it way back, because every go down a couple of years ago. So they've gone back to what they cut to last time.

245

00:24:43.590 --> 00:24:44.550

Kevin Magee: What is the committee.

246

00:24:48.510 --> 00:24:48.900

john cunningham: Um,

247

00:24:52.920 --> 00:24:53.190

Shavaun Towers: Well,

248

00:24:54.270 --> 00:25:00.750

Shavaun Towers: It looks like in terms of long range prioritization. They're getting down to some of the more minor

249

00:25:01.800 --> 00:25:06.990

Shavaun Towers: Streets that they just haven't addressed in the past. It is a lot of mileage

250

00:25:08.310 --> 00:25:20.760

Kevin Magee: But if you want before they start doing, we can have her wrong at a meeting before and we proved they're there, they're putting money. I don't have any permits yet from the request from MIT yet from them for this work.

251

00:25:23.580 --> 00:25:24.120

Kevin Magee: Guys.

252

00:25:29.100 --> 00:25:40.020

john cunningham: I think it's just going to throw up. I think it's okay. I think they do a pretty good job, they, they probably want to try to keep things safe. Surely I trust cabinet he's meeting with them and Kevin thinks that it's okay it's fine with me.

253

00:25:41.070 --> 00:25:46.830

Shavaun Towers: Yeah, in general, they've gotten the message. I think that they're doing a much better job.

254

00:25:47.250 --> 00:25:47.640

john cunningham: Mm hmm.

255

00:25:48.210 --> 00:25:48.810

As late

256

00:25:50.400 --> 00:25:53.520

Caroline Herrick: I don't think you can tell him anything, just from mileage. I mean,

257

00:25:54.960 --> 00:25:55.410

Shavaun Towers: Yeah.

258

00:25:55.500 --> 00:25:56.670

Caroline Herrick: What the factor is

259

00:25:57.000 --> 00:26:00.570

Shavaun Towers: Now it's the size of the amount of of

260

00:26:00.810 --> 00:26:01.890

Caroline Herrick: The amount of cutting

261

00:26:02.250 --> 00:26:05.550

Shavaun Towers: Cutting and you can't. You're right. You can't tell that from a map.

262

00:26:08.100 --> 00:26:16.500

Kevin Magee: Like I said, I'll find out because she wants to talk to us about their methods and stuff like that. So I find out when she's available when they plan on doing this work so

263

00:26:18.090 --> 00:26:21.420

Kevin Magee: That they meet with us so we can have her have her talk with the group here.

264

00:26:22.530 --> 00:26:34.740

Kevin Magee: If it's before our next meeting, we may just put a special date in for the for that single topic meeting. I think it's psychologically smart to be with them occasionally to know that we're watching

265

00:26:36.780 --> 00:26:37.110

Kevin Magee: Right.

266

00:26:38.250 --> 00:26:40.770

Kevin Magee: Okay, everybody else agree.

267

00:26:41.250 --> 00:26:42.390

Caroline Herrick: Yeah. Yes.

268

00:26:42.420 --> 00:26:43.980

Dottie: Huh oh yeah

269

00:26:46.110 --> 00:26:56.940

Kevin Magee: You're set that up, Kevin. Yes, I'll talk with her, find out what she's a for next month there when she's available. Okay. Next on the agenda.

270

00:26:59.520 --> 00:27:00.840

Kevin Magee: My agenda back up here.

271

00:27:03.540 --> 00:27:04.350

Kevin Magee: I'm

272

00:27:05.580 --> 00:27:08.550

Kevin Magee: So we have a violation.

273

00:27:09.690 --> 00:27:16.830

Kevin Magee: The Senate property at 16 fear street they pulled out the crab apple that we planted there.

274

00:27:17.970 --> 00:27:20.700

Kevin Magee: In 2018

275

00:27:25.050 --> 00:27:33.600

Kevin Magee: Where they working on something and then they redid all our landscape around the property. They're putting putting a new curbing and further their house there.

276

00:27:35.850 --> 00:27:40.770

Kevin Magee: I drove by and saw the truck in front of house there and looked at the contracting goes where did my tree go

277

00:27:43.920 --> 00:27:46.170

Kevin Magee: They, they notice actually going out in the mail today.

278

00:27:47.520 --> 00:27:52.260

Kevin Magee: We actually noticed this IN SEPTEMBER, TALK WITH A contractor and let's talk all they're going to be putting

279

00:27:53.400 --> 00:27:59.070

Kevin Magee: The tree was in decline. I'm not looking good. We're going to be planting more trees here.

280

00:28:01.080 --> 00:28:07.770

Kevin Magee: As of now, there hasn't been any trees replanted so I'm sending them a violation letter.

281

00:28:09.540 --> 00:28:12.990

Kevin Magee: Not in accordance to our statutes.

282

00:28:14.130 --> 00:28:24.030

Kevin Magee: My praise, they devalue of the tree, the founder of my notes we. It was a two and a half inch red draw crab crab apple tree that was planted on the property.

283

00:28:26.970 --> 00:28:31.770

Kevin Magee: They based on this method, which looks at the

284

00:28:32.880 --> 00:28:43.230

Kevin Magee: initial cost of the tree or that cost of purchasing in that tree. I'm planting fees lon some

285

00:28:44.790 --> 00:28:46.050

Kevin Magee: Care for the first year.

286

00:28:47.190 --> 00:28:47.970

Kevin Magee: I also included

287

00:28:49.020 --> 00:28:51.210

Kevin Magee: shipping fees and stuff like that. So they're

288

00:28:53.940 --> 00:28:57.150

Kevin Magee: The fine that's being issued to them is for \$650

289

00:29:00.540 --> 00:29:02.970

Kevin Magee: So that was that.

290

00:29:04.500 --> 00:29:05.040

Kevin Magee: Was it

291

00:29:05.790 --> 00:29:06.750

I don't remember. Oh.

292

00:29:07.830 --> 00:29:09.930

Dottie: No, it was in perfect shape.

293

00:29:11.310 --> 00:29:12.840

Dottie: I was taking care of

294

00:29:15.480 --> 00:29:16.920

Dottie: The tree was fine. Surely,

295

00:29:20.130 --> 00:29:21.510

Kevin Magee: That's fine, and

296

00:29:22.620 --> 00:29:36.930

Kevin Magee: Say well will be placed to trees. I think we have to be so prepared for that is fun. Well, the, the define the larger spent sent out mom okay for that one tree at \$650

297

00:29:38.340 --> 00:29:43.320

Kevin Magee: So he doesn't want to play, then from there we have our money back, plus a little extra

298

00:29:44.640 --> 00:29:54.300

Kevin Magee: To plant a tree somewhere else try to rationalize that he's planting to other trees. So you shouldn't have to pay the fine, but I think you should pay the fine.

299

00:29:55.770 --> 00:30:01.500

Kevin Magee: So, well, we'll get to find and find out what his intentions are for the front of the property. Also, okay.

300

00:30:02.760 --> 00:30:08.820

Kevin Magee: They're doing a gorgeous job with the house so unfortunate that they did that with the tree.

301

00:30:09.870 --> 00:30:20.250

Kevin Magee: Especially since he requested that the previous tree be taken down and the new one planted. Right. Is that my memory doesn't it took down to trees and

302

00:30:20.640 --> 00:30:30.870

Kevin Magee: I think we asked them at that point. Part of that to replant two trees. They never did. So we planted. We have money from the garden clubs. We planted one tree at that particular point in time.

303

00:30:32.280 --> 00:30:40.830

Kevin Magee: Okay, so they keep breaking a promise that so I'm learning. Now, when people do on more trees. I'm looking for replanting that I'm taking

304

00:30:42.210 --> 00:30:44.220

Kevin Magee: A bonds for the replanting

305

00:30:46.890 --> 00:30:48.360

Kevin Magee: Does anybody agree with the

306

00:30:49.380 --> 00:31:06.630

Kevin Magee: Fact that they're going to come back and say they're planting trees and they don't have to pay the fine that they still pay the fine there he's actually caught up on the legal process. Now with this issue he has any question about this. He actually has to refer this disappeared court.

307

00:31:07.470 --> 00:31:09.120

Kevin Magee: Okay. Hey, it's funny.

308

00:31:14.400 --> 00:31:21.420

Kevin Magee: This area within 10 days of receipt. He has to agreed this notice he has to file.

309

00:31:23.340 --> 00:31:25.590

Kevin Magee: Notice in writing to superior court in New Haven.

310

00:31:29.460 --> 00:31:31.500

Kevin Magee: Comment about it from the committee.

311

00:31:35.010 --> 00:31:45.120

Kevin Magee: Okay, moving on to the next agenda. So we'll kind of like keep straight with this one. So if something happens to another tree. We're starting make sure we have a good practice going on here and follow and oh yeah

312

00:31:46.380 --> 00:31:51.240

Kevin Magee: So next on our list is the tree policy.

313

00:31:52.230 --> 00:31:55.440

Shavaun Towers: I'm working on it. I'll try to get it next time.

314

00:31:55.800 --> 00:31:56.400

Shavaun Towers: I'm sorry.

315

00:31:56.640 --> 00:31:57.780

Kevin Magee: I know how that goes to

316

00:32:01.260 --> 00:32:05.970

Kevin Magee: The refurbishing the trees along the street they

317

00:32:07.830 --> 00:32:15.870

Kevin Magee: Go good actually barla was out there on just after Thanksgiving. Um, and redid the

318

00:32:17.190 --> 00:32:19.560

Kevin Magee: The soil and those planters there.

319

00:32:20.550 --> 00:32:21.750

Shavaun Towers: Who good so that's

320

00:32:21.780 --> 00:32:26.310

Kevin Magee: Been done, but we know work on changing elevation or anything of those things, but the

321

00:32:27.930 --> 00:32:39.570

Kevin Magee: New soil amendments and redoing the so i think they took out about 456 inches of material in the planters down to sort of the root zone or the top of the

322

00:32:42.420 --> 00:32:52.710

Kevin Magee: Top of the roots there and then replenish thing material there. Okay, thank God we finally got progress. So I got photos and stuff there. So I have to send them to

323

00:32:54.840 --> 00:32:56.760

Kevin Magee: The governor foundation there.

324

00:33:00.510 --> 00:33:04.530

Kevin Magee: I think we did about 10 points or something like that. There. Oh, fabulous.

325

00:33:05.790 --> 00:33:08.700

Kevin Magee: Good. And what do we do a great job.

326

00:33:10.800 --> 00:33:12.390

john cunningham: What would you like to do, surely.

327

00:33:15.750 --> 00:33:20.370

Kevin Magee: They're not too bad shape. I mean, part of its gonna have to be tied to work with the

328

00:33:21.600 --> 00:33:24.930

Kevin Magee: Engineering with any sidewalk or sidewalk work that gets done.

329

00:33:26.190 --> 00:33:34.620

john cunningham: That's the little problem. Surely it's a, it's a, it's a two or three part thing yes she could open up the greats, which I think at some point in time, we're going to is going to need to be done.

330

00:33:35.340 --> 00:33:47.070

john cunningham: You have to make sure the base for the greatest correct we've corrected the soil. But there's going to have to be some stonework around the great so it's a it's a moving process to do, is it a

331

00:33:48.030 --> 00:34:01.320

john cunningham: Are the trees in dire need of having that done. No, not it's not an emergency, would it be better if they were done. Yes, but it's you know it's going to cost money. Someone's gonna have to come up and pay that bill, you know,

332

00:34:06.240 --> 00:34:11.040

Kevin Magee: Yeah, they were the greater lifted up place next to the tree and then they were dropped right back on.

333

00:34:11.520 --> 00:34:23.940

Kevin Magee: Yep units at there's one great that we we have to work with public works to get cut out good. The tree is actually growing into it, unless you're on the dairy will fully lifted off because the tree was actually going into the

334

00:34:25.320 --> 00:34:32.370

Kevin Magee: One. A great serious. I have to work with public works to get that one that just it haven't come up with their torch and kind of cut it out.

335

00:34:33.780 --> 00:34:40.290

Caroline Herrick: And I just asked. I walked along Whitfield and it seemed to me some of those trees are really growing into the wires there.

336

00:34:41.400 --> 00:34:45.330

Caroline Herrick: In front of mixed design and in front of breakwater books, they look like they're all

337

00:34:47.070 --> 00:34:47.670

Kevin Magee: They get

338

00:34:50.130 --> 00:34:57.390

Kevin Magee: Yeah, they are growing up towards the, where's the simplest business has happened trimming them back there, but they are

339

00:35:00.150 --> 00:35:03.300

Kevin Magee: The most of wires. They're actually communications through they're

340

00:35:04.470 --> 00:35:05.610

Caroline Herrick: Not electricity.

341

00:35:05.910 --> 00:35:09.510

Kevin Magee: By won't really hurt anything with them going through their song. It's not electricity.

342

00:35:10.560 --> 00:35:13.920

john cunningham: And if there. I believe most of the trees are cherries, aren't they,

343

00:35:15.660 --> 00:35:19.020

Kevin Magee: Yeah, they think it might be a couple Stranglers for the

344

00:35:20.970 --> 00:35:21.960

john cunningham: End maybe get rid of

345

00:35:22.560 --> 00:35:27.600

john cunningham: Getting rid of the Bradford pair take those out will put two of the new trees is spring in those places.

346

00:35:28.740 --> 00:35:39.240

Kevin Magee: But what really comes to for a future pointing. We need to kind of take a look at those trees. Good. I think so. Several more maybe declined to and once they start blowing my mind my make a list for the following years

347

00:35:40.260 --> 00:35:43.140

Kevin Magee: For the trees in front of the stores there. OK.

348

00:35:45.540 --> 00:35:46.230

Kevin Magee: So that's

349

00:35:48.060 --> 00:35:53.970

Kevin Magee: Status that. So there's actually was movement on that one, for once, and they'll be happy, you know, once I send the pictures and stuff there.

350

00:36:00.240 --> 00:36:07.830

Kevin Magee: Yeah, we're over a good year on that one there. So yeah, I'll be happy to get that before. Yes, definitely.

351

00:36:09.360 --> 00:36:10.800

Kevin Magee: Next on the agenda.

352

00:36:12.330 --> 00:36:14.100

Kevin Magee: Down to perform

353

00:36:15.210 --> 00:36:16.200

Kevin Magee: Nobody's here.

354

00:36:17.400 --> 00:36:20.160

Dottie: I would like to bring something up. If I could

355

00:36:22.710 --> 00:36:37.410

Dottie: If it was brought to my attention. The Garden Club member Wendy McManus showed me an article about Hamptons notable tree, which is, which was published in the New Haven Register.

356

00:36:39.240 --> 00:36:47.910

Dottie: What she is hoping and I am too. We were talking about it, we would like to do something similar here in Guilford

357

00:36:49.290 --> 00:37:11.580

Dottie: Now that our country may be moving along, and looking more at environment, instead of viruses, hopefully, fingers crossed environment and trees, it might be a good. It's a good activity. The reason why I'm bringing it up with you is we certainly would need your expertise.

358

00:37:13.050 --> 00:37:18.090

Dottie: The tree commission in Hamden actually runs runs the

359

00:37:19.380 --> 00:37:22.290

Dottie: Notable tree of the month, but the Garden Club.

360

00:37:23.520 --> 00:37:36.300

Dottie: Wendy and I would be very happy to do that. And what they do is they ask anybody to nominate a tree that is either special has a good history or

361

00:37:37.980 --> 00:37:40.620

Dottie: I don't know. It's beautiful. Remarkable.

362

00:37:41.910 --> 00:37:49.170

Dottie: Something like that. So if we were to get this going. And I think maybe through either shoreline times or

363

00:37:50.730 --> 00:37:51.870

Dottie: Or the current

364

00:37:52.920 --> 00:38:02.730

Dottie: We would have to come up with trees first just to get the ball rolling. And then hopefully people would start responding and I

365

00:38:03.300 --> 00:38:14.880

Dottie: willing to bet there's a lot of good stories out there. Hopefully that we could bring to the public, but also bring a little bit more awareness to the trees in our, in our town.

366

00:38:22.410 --> 00:38:23.100

Kevin Magee: Direction.

367

00:38:25.980 --> 00:38:39.780

Kevin Magee: Every public tree downtown on the right of way, and then people's run yards. I know there was like take a pomegranate tree on State Street. That was one of the notable trees in Connecticut.

368

00:38:40.860 --> 00:38:44.550

Kevin Magee: And so that it is in the library.

369

00:38:46.410 --> 00:38:52.320

Dottie: And you give me a copy of that surely I like have a copy of that is that possible know

370

00:38:53.250 --> 00:38:55.830

Kevin Magee: Is really never

371

00:38:56.490 --> 00:38:57.240

Dottie: Oh, okay.

372

00:38:57.960 --> 00:39:00.840

Dottie: But, but it's in the library. Okay.

373

00:39:01.590 --> 00:39:15.480

Kevin Magee: The library and Kevin should have a copy, right, Kevin. I think one or two copies of it. I think I'm not sure. Okay, I know I have least one of my shelf here it looks into that I just remember the pomegranate tree.

374

00:39:16.200 --> 00:39:18.630

Dottie: And what is that on our

375

00:39:19.680 --> 00:39:20.040

Kevin Magee: Website. I

376

00:39:22.350 --> 00:39:22.950

Shavaun Towers: Yes.

377

00:39:23.640 --> 00:39:24.330

john cunningham: Probably, yeah.

378

00:39:24.990 --> 00:39:26.370

Kevin Magee: It's on State Street.

379

00:39:27.720 --> 00:39:31.620

Kevin Magee: Just at the beginning is State Street on the right side going north

380

00:39:33.960 --> 00:39:40.110

Shavaun Towers: Have any other Connecticut notable trees because obviously that would be the easiest place to start.

381

00:39:41.610 --> 00:39:44.460

Kevin Magee: I think there is a web page for ones that people noted

382

00:39:45.120 --> 00:39:45.540

Yeah.

383

00:39:48.120 --> 00:39:50.490

Shavaun Towers: I mean, just as a place to start but

384

00:39:50.850 --> 00:39:52.650

Dottie: Yeah, yeah, that would be great.

385

00:39:54.780 --> 00:39:56.130

Dottie: So go to the website.

386

00:39:57.120 --> 00:40:03.360

Kevin Magee: When they change their name from memorable to notable I was going to make that correction at the board meeting.

387

00:40:04.530 --> 00:40:07.020

Kevin Magee: No other notable trees that memorable trees.

388

00:40:07.980 --> 00:40:17.160

Dottie: Yeah, that's what it is. It's, it's, she said. Notable thought but that's what you wrote me notable maybe she did say memorable. But that's OK.

389

00:40:20.190 --> 00:40:22.740

Kevin Magee: OK, I think that's a great program.

390

00:40:27.030 --> 00:40:27.420

Dottie: Good.

391

00:40:27.510 --> 00:40:27.840

Good.

392

00:40:29.700 --> 00:40:43.140

Dottie: Um, yeah, we would we would try and implement it and get it going. But we certainly need all of you, I don't know, in terms of digging things up as things go ahead. I'll have a lot of questions is, I think what I'm saying. So

393

00:40:46.260 --> 00:40:46.920

Dottie: Excuse me.

394

00:40:48.510 --> 00:40:48.840

Shavaun Towers: I said,

395

00:40:48.870 --> 00:40:50.040

Shavaun Towers: I'll be glad to help.

396

00:40:53.010 --> 00:40:56.010

Dottie: Carolyn, if that's something that you want to join us in

397

00:40:56.040 --> 00:41:05.700

Caroline Herrick: That would I think that. Yeah, I was gonna suggest that to have the lead Thailand Garden Club join and helping you go for a garden club and whatever way we can with that.

398

00:41:06.570 --> 00:41:08.940

Dottie: Yeah, that would be great. I'll talk to you about it.

399

00:41:11.370 --> 00:41:11.640

Kevin Magee: Right.

400

00:41:12.780 --> 00:41:16.830

Kevin Magee: Here to inventory all those trees. So the god they were hundreds and hundreds

401

00:41:18.960 --> 00:41:20.520

Kevin Magee: The trees inventory

402

00:41:21.720 --> 00:41:36.960

Kevin Magee: And then there was an inventory of trees done 77 also that should be in George's office Kevin Yeah, I'll send you a copy those two from that one there. Okay, so you should so Kevin has the resources to work but

403

00:41:36.990 --> 00:41:37.230

Kevin Magee: Should

404

00:41:38.130 --> 00:41:41.310

Kevin Magee: You should look first at the notable trees because advocate.

405

00:41:42.540 --> 00:41:43.410

Kevin Magee: The across I

406

00:41:44.730 --> 00:41:47.670

Kevin Magee: Got that persimmon on the notable areas of Connecticut.

407

00:41:48.750 --> 00:41:57.360

Dottie: So this i'm really ignorant here. What is what makes a notable tree. I just thought it was if it was big and large and prettier. So

408

00:41:59.310 --> 00:42:00.510

Kevin Magee: I think you need right

409

00:42:01.170 --> 00:42:01.530

Okay.

410

00:42:02.700 --> 00:42:15.870

Shavaun Towers: I think part of what you are correct. I mean, some of the notable trees are just really mature BEAUTIFUL SPECIMEN that are just notable in how they represent the species.

411

00:42:16.920 --> 00:42:22.590

Shavaun Towers: And I'll have to do a little research to find the less, but it is plus i know that it exists, and we'll start there.

412

00:42:23.670 --> 00:42:26.370

Dottie: Oh, great, great. That's wonderful.

413

00:42:29.730 --> 00:42:30.330

Dottie: Thank you.

414

00:42:31.650 --> 00:42:32.130

Kevin Magee: We need a

415

00:42:33.450 --> 00:42:34.020

Kevin Magee: Dorset.

416

00:42:35.940 --> 00:42:36.690

Dottie: I don't know.

417

00:42:38.280 --> 00:42:39.330

john cunningham: I don't think so. Surely,

418

00:42:39.870 --> 00:42:42.330

Dottie: I feel like I've got your support.

419

00:42:43.320 --> 00:42:45.540

Shavaun Towers: Man, I think that's all you need real I

420

00:42:45.990 --> 00:42:46.560

Dottie: Think you

421

00:42:48.210 --> 00:42:59.340

Dottie: That'll be great now well that the big hurdle is getting somebody from the times are the current to allow us that publication, to put it into the paper.

422

00:43:00.780 --> 00:43:02.550

Dottie: Yeah, I'll work on that.

423

00:43:04.320 --> 00:43:04.860

Kevin Magee: Okay.

424

00:43:04.890 --> 00:43:05.370

Dottie: Thank you.

425

00:43:06.480 --> 00:43:09.210

Kevin Magee: Is there anything else on the agenda. Do we have to pay bills.

426

00:43:10.830 --> 00:43:13.230

Kevin Magee: We do have to pay one bill.

427

00:43:16.080 --> 00:43:16.890

Kevin Magee: For Cathy

428

00:43:18.330 --> 00:43:21.780  
Kevin Magee: And it's \$102 and 60 cents.

429  
00:43:23.010 --> 00:43:24.060  
Kevin Magee: To pay the bill.

430  
00:43:30.210 --> 00:43:31.260  
Kevin Magee: On favor

431  
00:43:41.820 --> 00:43:42.300  
Kevin Magee: Okay.

432  
00:43:48.990 --> 00:43:49.770  
john cunningham: Sounds good.

433  
00:43:52.200 --> 00:43:52.770  
Shavaun Towers: I

434  
00:43:57.210 --> 00:43:59.400  
john cunningham: Surely, good luck with your, with your iPad.
