

WEBVTT

1

00:00:01.800 --> 00:00:02.250

Kevin Magee: Okay.

2

00:00:03.389 --> 00:00:09.990

Kevin Magee: We have with us today is Jenna Turner the arborist with ever source to kind of go over there.

3

00:00:10.530 --> 00:00:11.460

12035354956: tree Program.

4

00:00:14.250 --> 00:00:15.330

Kevin Magee: We have her.

5

00:00:17.430 --> 00:00:21.930

Kevin Magee: This that we know, whatever source doesn't stop I'll grab your slides there.

6

00:00:22.260 --> 00:00:23.940

Jenna Turner: Thanks Kevin can everyone hear me okay.

7

00:00:26.010 --> 00:00:26.400

yeah.

8

00:00:28.650 --> 00:00:29.040

Jenna Turner: So you're.

9

00:00:29.280 --> 00:00:31.260

Jenna Turner: A short presentation that has some.

10

00:00:31.410 --> 00:00:35.370

Jenna Turner: Children if Kevin's able to pull that up and share it on the screen.

11

00:00:35.910 --> 00:00:36.750

Jenna Turner: Again, my name is.

12

00:01:17.790 --> 00:01:19.620

Jenna Turner: slideshow and then.

13

00:01:21.630 --> 00:01:23.490
Jenna Turner: A slideshow from beginning.

14
00:01:24.750 --> 00:01:25.440
Okay, all right.

15
00:01:26.520 --> 00:01:28.470
Jenna Turner: Thank you can everyone see the screen.

16
00:01:29.850 --> 00:01:36.090
Jenna Turner: Okay, great first of all, if anyone has any questions at any time, please feel free to interrupt me.

17
00:01:36.420 --> 00:01:48.000
Jenna Turner: I was just going to be a short overview of every sources vegetation management program and the ones that we have planned for Guilford for the year 2021 so Kevin you could go ahead to the next slide.

18
00:01:52.140 --> 00:02:02.130
Jenna Turner: So the first thing I wanted to overview is our distribution cycle, so we are my four year cycle through excited distribution.

19
00:02:02.130 --> 00:02:04.110
12035354956: lines and distribution.

20
00:02:05.430 --> 00:02:06.300
Jenna Turner: Is the.

21
00:02:06.960 --> 00:02:09.150
Jenna Turner: Electric wires that you see roadside from here.

22
00:02:09.150 --> 00:02:12.000
Jenna Turner: To the big ones that you see running through the woods, the transmission.

23
00:02:12.000 --> 00:02:12.360
Sydney Cunningham: lines.

24
00:02:12.660 --> 00:02:17.310
Jenna Turner: So i'm universe for distribution so most of what you see as you drive around town with.

25

00:02:18.480 --> 00:02:19.740
Jenna Turner: Our distribution system.

26
00:02:20.910 --> 00:02:30.960
Jenna Turner: These are the three trimming specifications that we do throughout town based on mostly customer can.

27
00:02:31.710 --> 00:02:49.830
Jenna Turner: depend on reliability and other factors we do a different approach of these three trimming specifications and that's on a four year cycle so every circuit in belfer every road is going to be trying to every four years, the first one is our standard.

28
00:02:51.810 --> 00:03:04.290
Jenna Turner: And that's where and that's where we're looking to trim 16 to 20 feet above the theoretical conductors eight feet, to the side and 10 people.

29
00:03:04.680 --> 00:03:17.220
Jenna Turner: So we're really we're creating a window of clearance we're doing that because we want to prevent the trees and the vegetation through going back into contact with the power lines in that four year period so that's.

30
00:03:17.280 --> 00:03:18.990
Jenna Turner: that's the clearance that we see.

31
00:03:19.050 --> 00:03:20.190
As a standard.

32
00:03:21.780 --> 00:03:29.070
Jenna Turner: trimming we also have been, which is our maintenance enhanced tree trimming this is places where.

33
00:03:29.130 --> 00:03:31.470
12035354956: we've done against tree trimming in the past.

34
00:03:31.860 --> 00:03:33.030
Jenna Turner: And we're just.

35
00:03:34.200 --> 00:03:51.780
Jenna Turner: Re establishing that clearance for coming through and we're returning anything that's growing last four years and that's what we're

looking for 20 feet of overhead over the lines and eight feet of clearance to the side of the lines and that's that's be.

36

00:03:53.790 --> 00:03:54.840

Jenna Turner: And then, finally, we have our.

37

00:03:55.080 --> 00:03:55.500

Jenna Turner: hands.

38

00:03:55.590 --> 00:03:57.630

12035354956: tree trimming etc.

39

00:03:58.080 --> 00:04:09.780

Jenna Turner: This is where we look to see at a glance over from the power lines and they're all the way up to blue sky and the goal of this clearing zone is.

40

00:04:09.870 --> 00:04:10.470

Jenna Turner: To.

41

00:04:10.560 --> 00:04:12.150

Jenna Turner: move our overhead over the.

42

00:04:12.540 --> 00:04:19.230

Jenna Turner: Years because we know when we have some words, especially in the winter, when we have icing or having wet snow.

43

00:04:19.650 --> 00:04:21.690

12035354956: We have branches hanging.

44

00:04:21.750 --> 00:04:33.960

Jenna Turner: Over the conductor's that's going to increase the risk of power outages blizzard ATT I used to talk about that a little bit later on, and especially TT there is no scheduled in Guilford this year.

45

00:04:34.620 --> 00:04:37.800

Jenna Turner: Have any etc schedule so looking at this.

46

00:04:37.800 --> 00:04:49.050

Jenna Turner: slide for this upcoming year, all we have scheduled is me and be we don't have any of these see type clearance as well for this point for this upcoming year.

47

00:04:50.160 --> 00:04:53.910

Jenna Turner: i'm telling you can go ahead to the next slide unless anyone has any questions oh man.

48

00:05:00.600 --> 00:05:18.030

Jenna Turner: Just don't review really quickly our consent process on utility tree work is performed by Lucas three experts, they have planners that go door to door and with conviction, you have slightly adjusted the door to door in that we do try to contact customers by.

49

00:05:18.600 --> 00:05:19.770

12035354956: email as well.

50

00:05:20.160 --> 00:05:23.670

Jenna Turner: And two women in person interaction due.

51

00:05:23.670 --> 00:05:24.630

12035354956: To the.

52

00:05:25.110 --> 00:05:33.240

Jenna Turner: pandemic, and so we do also call customers email, and we will we door he knows where customers are looking for consent.

53

00:05:33.600 --> 00:05:47.850

Jenna Turner: To do tree work we don't go in so many the families determine where the town runaways and we're private properties, we just touch base with your budding property owner regardless for any treat remain or.

54

00:05:49.620 --> 00:05:53.400

Jenna Turner: On their property, we also work with Kevin.

55

00:05:53.460 --> 00:05:54.570

12035354956: To review.

56

00:05:54.630 --> 00:05:55.320

12035354956: The work.

57

00:05:55.410 --> 00:06:00.330

Jenna Turner: To especially review renewals that are associated with that work and he's counting sheep.

58

00:06:01.530 --> 00:06:17.880

Jenna Turner: And then another thing that's important to understand is that I have myself as the arborist a big part of my job is quality control, so I go and I review every single span every single property that we do after the contract and I go back through and I review it for quality.

59

00:06:17.970 --> 00:06:18.780

12035354956: To ensure them a.

60

00:06:18.960 --> 00:06:20.250

12035354956: Proper planning comments.

61

00:06:20.880 --> 00:06:23.790

Jenna Turner: To ensure that their industry standards for you.

62

00:06:25.500 --> 00:06:30.900

Jenna Turner: that's that's our consent process on overview does anyone have any questions about that.

63

00:06:34.590 --> 00:06:39.720

Jenna Turner: Then we can we can move on to be snappy and is have a lot of things to cover in a meeting.

64

00:06:41.310 --> 00:06:42.930

Jenna Turner: And he's our town map for.

65

00:06:42.960 --> 00:06:46.260

Jenna Turner: 2021 so this over.

66

00:06:47.670 --> 00:06:57.270

Jenna Turner: The surface that are going to be trimmed the timing, for this is going to be the second half of this year, coming.

67

00:06:59.340 --> 00:06:59.940

Jenna Turner: Up date.

68

00:07:00.870 --> 00:07:01.530

Jenna Turner: With the.

69

00:07:01.950 --> 00:07:07.410

Jenna Turner: specifics, you know before we actually start there were several ones out for me to turn into permissions work.

70

00:07:08.550 --> 00:07:11.820

Jenna Turner: On when we look at this map where we can is you're looking at the town.

71

00:07:12.300 --> 00:07:13.920

Jenna Turner: And then there's a legend on.

72

00:07:13.920 --> 00:07:23.820

Jenna Turner: The right that shows a red line the outline the red line that's the circuit that phone miles that we're going to be for me and then the.

73

00:07:25.230 --> 00:07:35.070

Jenna Turner: That is the schedule the training that we're going to be doing if we thought back to the first slide the backbone.

74

00:07:35.490 --> 00:07:36.870

Jenna Turner: Of corresponds would.

75

00:07:36.900 --> 00:07:49.650

Jenna Turner: Be, which is the greater clearance and then we can go back to be that's the blue line that's that's what we do on our backbones and then is what we do that's that's the blue.

76

00:07:50.460 --> 00:08:05.130

Jenna Turner: He is read any woman so everything shown here in boom is going to be credited to our schedule wheels turning and you can see legend here and we can send this presentation to everyone who wants to but.

77

00:08:05.910 --> 00:08:24.780

Jenna Turner: The names are there in the legend we have for basketball miles, we have about 10 miles 10 miles trimming the rest of scheduled maintenance trimming that's about 40 miles, so we have 53 mile the training scheduled for the children.

78

00:08:26.490 --> 00:08:31.620

Jenna Turner: And again, we, we do not have any ATT scheduled.

79

00:08:31.860 --> 00:08:33.420

Jenna Turner: On within.

80

00:08:34.080 --> 00:08:35.370
Jenna Turner: This calendar year.

81
00:08:37.380 --> 00:08:38.910
Jenna Turner: They have any questions on the.

82
00:08:38.910 --> 00:08:39.240
map.

83
00:08:43.110 --> 00:08:44.760
Jenna Turner: Great we can go on to the next one.

84
00:08:46.110 --> 00:08:55.470
Jenna Turner: The other program that we have the under training program is, we have a chance or new program is called is our each PR program, so this is where.

85
00:08:55.680 --> 00:08:56.160
Jenna Turner: I.

86
00:08:56.280 --> 00:09:05.280
Jenna Turner: identified trees that are declining they might have structural defects they might have it might be code arm and.

87
00:09:06.060 --> 00:09:24.390
Jenna Turner: sugary having been to the wires all the assessment is dead trees, is of course focused around risk they pose to our primary wires going focusing on trees that have the potential to cause power outages so we're really focusing on these things, mostly dead trees.

88
00:09:24.450 --> 00:09:27.150
Jenna Turner: Emerald ash borer treaties.

89
00:09:27.630 --> 00:09:29.370
Jenna Turner: The gypsy laundrette.

90
00:09:30.210 --> 00:09:31.440
12035354956: Unfortunately.

91
00:09:31.470 --> 00:09:33.090
Jenna Turner: killed off a lot of our old trees.

92

00:09:33.390 --> 00:09:34.800
Jenna Turner: But other species that.

93
00:09:34.800 --> 00:09:37.980
Jenna Turner: might still be alive, but I have defects.

94
00:09:39.690 --> 00:09:45.930
Jenna Turner: And we also prioritize on earth is truly grab some free.

95
00:09:48.210 --> 00:09:55.680
Jenna Turner: Some examples of Rosa we have that are returning this year, with no rules set some hill.

96
00:09:56.640 --> 00:09:57.990
Jenna Turner: Road as well as.

97
00:09:58.590 --> 00:10:03.660
Jenna Turner: we're having reliability hotspots Kevin we just had some come up on West street.

98
00:10:03.720 --> 00:10:05.340
Jenna Turner: Members name and i'm going to be reaching.

99
00:10:05.340 --> 00:10:18.810
Jenna Turner: out to you about where we do monitor the frequency of tree current outages for customers and if they reach a certain threshold within a certain amount of time we flagged with reliability issues and grounding.

100
00:10:20.730 --> 00:10:22.020
Jenna Turner: In those areas.

101
00:10:23.040 --> 00:10:31.770
Jenna Turner: So that's that's it now so Kevin I work together when he has a request for talent trees that need to come down because they're defining.

102
00:10:32.940 --> 00:10:36.150
Jenna Turner: A risk to the right of way and Ghana.

103
00:10:39.840 --> 00:10:50.580

Jenna Turner: And so it's mostly focus on dad has her trees, but we also do target trees, based on our defects and other things that could lead to Sydney encouraging power outages.

104

00:10:50.940 --> 00:10:58.200

Jenna Turner: And we focus more on the areas that are going to have the highest customer count So when I say back to learn.

105

00:10:58.650 --> 00:11:16.140

Jenna Turner: lines where the tree thumbs down on them third, and we take out the entire circuit and and take out 400 500 people, and so we have a different criteria to try to keep his backbone lines here, and we really targeting the trees that might not necessarily be completely down to.

106

00:11:16.140 --> 00:11:16.650

12035354956: This and have.

107

00:11:16.950 --> 00:11:22.110

Jenna Turner: A pretty concerning defect, we might approach Kevin and or the property owners about moving them.

108

00:11:25.980 --> 00:11:26.940

Jenna Turner: Questions about that.

109

00:11:29.400 --> 00:11:41.910

Jenna Turner: So we have to do more and overview and for you quickly about his etc, because in the town of Guilford really have not, in the past couple years we've been just leave it on that side of things.

110

00:11:43.140 --> 00:11:45.240

Jenna Turner: In the past couple of years we.

111

00:11:46.380 --> 00:12:02.520

Jenna Turner: have not performed for each etc so it's something you'd like to have a discussion about and again that's our clearance where we're looking to trim some ground to sky now it's it's not really important at the current moment because we don't have any schedule this year.

112

00:12:03.150 --> 00:12:05.460

12035354956: There is no ETA at at.

113

00:12:05.520 --> 00:12:11.070

Jenna Turner: brown describes scheduled income, this year, how we typically have handled it in your answer is, we.

114

00:12:12.090 --> 00:12:26.850

Jenna Turner: Have a 20 foot overhead and centered clearing all the way up to quantify the reason I still want to have this conversation, even though we don't have any of this work schedule this year is when we do reliability.

115

00:12:28.500 --> 00:12:28.950

12035354956: Also.

116

00:12:29.070 --> 00:12:33.720

Jenna Turner: Times consider doing what we call customer focus.

117

00:12:35.040 --> 00:12:45.600

Jenna Turner: customer focus a tree trimming and again, as you can you go back to the second slide the one that shows the specifications just to make sure that everyone's clear I know there's a lot of.

118

00:12:45.600 --> 00:12:46.290

acronyms.

119

00:12:48.420 --> 00:13:04.260

Jenna Turner: See here, this is just dance tree trimming, and this is something that in the town comment, we don't do we only see the 24 overhead so we, we really do level B and I certainly understand that.

120

00:13:05.010 --> 00:13:05.970

Jenna Turner: utility that.

121

00:13:06.750 --> 00:13:12.540

Jenna Turner: it's a balance between you know the urban forest between our customers, you want, but.

122

00:13:13.710 --> 00:13:16.800

Jenna Turner: The number of severe storms, we had last year from the.

123

00:13:16.800 --> 00:13:17.970

12035354956: tropical storm.

124

00:13:18.750 --> 00:13:20.040

Jenna Turner: From the microburst that.

125

00:13:20.040 --> 00:13:21.630

Jenna Turner: came through and had a significant.

126

00:13:21.630 --> 00:13:23.190

Jenna Turner: impact on our customers.

127

00:13:23.520 --> 00:13:31.230

Jenna Turner: So my goal is to try to get as much clearance from the trees when that's needed, and so, when I talk about.

128

00:13:31.260 --> 00:13:33.450

12035354956: ATT put up this.

129

00:13:33.480 --> 00:13:36.450

Jenna Turner: Year errands something.

130

00:13:36.720 --> 00:13:37.950

12035354956: When we have these.

131

00:13:38.010 --> 00:13:39.480

Jenna Turner: Reliability hotspots.

132

00:13:39.570 --> 00:13:50.460

Jenna Turner: Where customers are having repeated averages are having issues and you want to talk about doing some at&t in these areas as of right now that's not something that.

133

00:13:50.910 --> 00:13:53.130

Jenna Turner: would be allowed it's kind of a blanket.

134

00:13:53.160 --> 00:14:02.250

Jenna Turner: restriction, where I don't expect that there are spiritual being completely with did, but maybe like the more hybrid approach where.

135

00:14:02.880 --> 00:14:11.790

Jenna Turner: Instead of pruning this way, maybe we will get more pleased to be removed because I understand, like the aesthetics of this this etc.

136

00:14:12.420 --> 00:14:24.870

Jenna Turner: Which is trying to do more for the customer again repeated reliability issues and to do more and try to create better liability in these forums and you can face in the last year, so.

137

00:14:25.980 --> 00:14:26.760

Jenna Turner: Have a quick discussion.

138

00:14:27.870 --> 00:14:28.770

Jenna Turner: With Kevin.

139

00:14:43.500 --> 00:14:43.980

Take it down.

140

00:15:02.190 --> 00:15:06.030

Sydney Cunningham: Kevin one question jenna john Cunningham, I met you down on.

141

00:15:07.890 --> 00:15:08.580

Sydney Cunningham: On high street.

142

00:15:09.270 --> 00:15:13.590

Sydney Cunningham: When you get to level see the enhanced tree trimming.

143

00:15:14.940 --> 00:15:27.450

Sydney Cunningham: And there is a mature tree that you know let's say in your professional opinion you'd like to go with see but maybe it's the whole tree comes down this Kevin get.

144

00:15:28.260 --> 00:15:36.720

Sydney Cunningham: flagged like this do you then call kevin's office and say hey we'd like to take this tree completely down as opposed to doing CD before that happens.

145

00:15:38.100 --> 00:15:39.150

12035354956: we've been doing that more.

146

00:15:39.150 --> 00:15:41.130

Jenna Turner: Often it, especially if it's in the town right.

147

00:15:42.450 --> 00:15:42.630

Jenna Turner: We.

148

00:15:42.720 --> 00:15:43.050
12035354956: Have.

149

00:15:43.140 --> 00:15:48.060
Jenna Turner: been taking the approach more of instead of doing trimming trying to.

150

00:15:48.270 --> 00:15:49.080
Sydney Cunningham: Please yeah.

151

00:15:53.400 --> 00:16:04.050
Kevin Magee: yeah anytime any partly said anytime they want to do work the dirt on a town tree there, like any resident in town required to have a permit taken out through the my office of the tree warning.

152

00:16:05.520 --> 00:16:08.160
Kevin Magee: So when they're removing also is they still have.

153

00:16:08.160 --> 00:16:08.970
12035354956: To follow with.

154

00:16:09.060 --> 00:16:13.620
Kevin Magee: So follow the regulations, where I still have to post that tree refer removal.

155

00:16:14.700 --> 00:16:16.560
Kevin Magee: For public notice and stuff so.

156

00:16:18.600 --> 00:16:22.590
Kevin Magee: Then, looking at least it mostly in the past year, the trees have been.

157

00:16:22.590 --> 00:16:23.190
12035354956: removed.

158

00:16:23.220 --> 00:16:24.000
12035354956: or pretty much.

159

00:16:24.030 --> 00:16:26.130
Kevin Magee: Would the budgets they've been having and our budgets.

160

00:16:26.520 --> 00:16:29.970

Kevin Magee: are pretty much the dead ones we haven't really been doing much of the.

161

00:16:31.530 --> 00:16:33.420

Kevin Magee: Instead of doing enhanced tree trimming.

162

00:16:34.950 --> 00:16:36.000

Kevin Magee: doing the removals.

163

00:16:36.510 --> 00:16:38.790

Kevin Magee: We haven't really been doing much of that lately unless the.

164

00:16:38.790 --> 00:16:44.130

Kevin Magee: tree is like gone on high street there the trees physically up into the wires.

165

00:16:44.130 --> 00:16:44.640

or.

166

00:16:46.200 --> 00:16:47.970

Kevin Magee: fairly close to the wires were.

167

00:16:49.290 --> 00:16:55.410

Kevin Magee: Even the enhanced work doesn't even make a difference because of the proximity of the treat to the wires there.

168

00:16:55.770 --> 00:16:57.300

Sydney Cunningham: Kevin that's what I was leading up.

169

00:16:57.300 --> 00:16:58.110

12035354956: To and.

170

00:16:58.140 --> 00:16:59.910

Sydney Cunningham: jenna please chime in.

171

00:16:59.970 --> 00:17:08.460

Sydney Cunningham: If you're going to go back to a tree and basically perform level see enhanced tree trimming.

172

00:17:09.540 --> 00:17:25.380

Sydney Cunningham: four to five different times and the tree is the wrong tree that is underneath the wires or next to the wires it probably makes

more sense to physically remove the tree and replant something that might stay at the.

173

00:17:25.620 --> 00:17:26.820

At the height that you want.

174

00:17:30.480 --> 00:17:33.240

Sydney Cunningham: To see up out of the ever suppose people think about that.

175

00:17:34.950 --> 00:17:35.760

Jenna Turner: And so.

176

00:17:36.750 --> 00:17:37.350

Jenna Turner: That certain.

177

00:17:38.250 --> 00:17:47.940

Jenna Turner: circumstance certainly comes up now that tree might be in general, healthy It might not have a lot of signs of decay or decline or detox.

178

00:17:49.440 --> 00:17:56.700

Jenna Turner: You know the property owner doesn't want to see it removed because it's it's not declining it's just in the wrong place.

179

00:17:57.780 --> 00:18:02.040

Jenna Turner: I can tell you, you know, in the past and we have more teams.

180

00:18:02.910 --> 00:18:04.050

Jenna Turner: I might not have had the.

181

00:18:04.050 --> 00:18:05.370

Jenna Turner: Budget to remove every.

182

00:18:05.370 --> 00:18:06.000

Jenna Turner: tree that I.

183

00:18:06.450 --> 00:18:09.540

Jenna Turner: Get that had to be done to this.

184

00:18:09.570 --> 00:18:10.620

Jenna Turner: etc So what do.

185

00:18:10.620 --> 00:18:15.990

Jenna Turner: You certainly can come into come into play here, and again just to reiterate.

186

00:18:16.770 --> 00:18:29.220

Jenna Turner: We don't have any of this coming up right now, I just wanted to take this opportunity to start the conversation about it, so that if it does come up and we have a certain road that I want to do this EC T on that.

187

00:18:30.000 --> 00:18:34.860

Jenna Turner: We can talk about it and then it's just saying no we can't do that maybe we.

188

00:18:34.860 --> 00:18:35.220

12035354956: Can.

189

00:18:35.370 --> 00:18:36.240

12035354956: You know, remove more.

190

00:18:36.270 --> 00:18:44.970

Jenna Turner: trees are looking at them and see which trees in the trend to this maybe they're set back a little bit further, maybe they you know have those larger.

191

00:18:46.080 --> 00:18:47.850

Jenna Turner: structure and look at it.

192

00:18:49.080 --> 00:18:54.570

Jenna Turner: You know, case by case individually previous that does come up but, again, we don't have any scheduled right now.

193

00:18:57.150 --> 00:18:59.730

Jenna Turner: You think it will come up right now.

194

00:19:01.260 --> 00:19:01.560

Okay.

195

00:19:02.880 --> 00:19:03.450

Kevin Magee: Do you want to stay.

196

00:19:03.510 --> 00:19:05.190

Kevin Magee: We do have some trees that do.

197

00:19:05.220 --> 00:19:08.880

Kevin Magee: Get cut into the sea standard, because a tree isn't tall enough.

198

00:19:10.200 --> 00:19:12.360

Kevin Magee: To have that 20 to 30 foot overhead.

199

00:19:13.410 --> 00:19:17.640

Kevin Magee: So we do have some which are basically half off.

200

00:19:18.990 --> 00:19:25.200

Kevin Magee: As part of the trimming some of the larger and more mature oak trees maples and stuff.

201

00:19:26.580 --> 00:19:31.740

Kevin Magee: we've been looking for the that the higher Clarence above it to.

202

00:19:32.880 --> 00:19:44.700

Kevin Magee: maintain some of the cover above the road for guess the recreational use of the property, the roadway also for the the walkers and those type of activities bikers, and everything else.

203

00:19:50.640 --> 00:19:53.970

Jenna Turner: Does anyone have any other questions about TT er.

204

00:19:54.990 --> 00:19:56.850

Jenna Turner: Ah, my name that we are coming up this year.

205

00:19:58.170 --> 00:20:00.600

Kevin Magee: I know she came and he have any questions or concerns.

206

00:20:15.240 --> 00:20:19.080

Jenna Turner: You are welcome to share this presentation, if anyone wants.

207

00:20:19.890 --> 00:20:21.180

Jenna Turner: More information about what.

208

00:20:21.540 --> 00:20:26.550

Jenna Turner: will be working on, we can certainly share that information and then, when we get closer.

209

00:20:28.200 --> 00:20:34.170

Jenna Turner: To my contract supervision, we work with Kevin he knows in the coming into town and he refused to work with us.

210

00:20:37.500 --> 00:20:44.340

Kevin Magee: So if we come up with one of these these areas like this, we can probably use a study area see how it goes I guess the Poli.

211

00:20:46.110 --> 00:20:47.820

Jenna Turner: You would think that I think that sounds like a great.

212

00:20:47.970 --> 00:20:48.390

12035354956: idea.

213

00:20:48.720 --> 00:20:51.840

Jenna Turner: And again, instead of just saying we're not going to do this at all, maybe.

214

00:20:52.320 --> 00:20:57.630

Jenna Turner: Take it as a pre approved with these key areas if they do come.

215

00:20:57.630 --> 00:20:59.910

Jenna Turner: up this year we'll see.

216

00:20:59.940 --> 00:21:08.100

Jenna Turner: What happens and hopefully there won't be reliability issues that need them, but we're always monitoring that and when people are having.

217

00:21:08.130 --> 00:21:10.020

12035354956: cheated tree cause outages.

218

00:21:10.050 --> 00:21:10.230

Jenna Turner: The.

219

00:21:10.260 --> 00:21:13.950

Jenna Turner: ATT clearances do really help because that.

220

00:21:13.980 --> 00:21:14.910

12035354956: overhead.

221

00:21:15.180 --> 00:21:16.410

Jenna Turner: That overhead branches.

222

00:21:16.440 --> 00:21:22.410

Jenna Turner: gravity when when something breaks it's going to fall down on the whiners and, and the reason for me, bring up this.

223

00:21:22.410 --> 00:21:23.340

12035354956: topic is.

224

00:21:23.520 --> 00:21:38.310

Jenna Turner: really large number of events that we had the tropical storm and August, the microburst that affected you don't see branford prefer to go to and just trying to do the most we can to be ready for small storms and big.

225

00:21:40.590 --> 00:21:42.690

Kevin Magee: Data does your notes from these storms.

226

00:21:43.320 --> 00:21:44.460

Kevin Magee: indicate if it's.

227

00:21:44.670 --> 00:21:46.230

Kevin Magee: The outages from.

228

00:21:46.260 --> 00:21:49.710

Kevin Magee: branches or from trees falling on to these.

229

00:21:49.740 --> 00:21:52.530

Kevin Magee: wires creating these hotspot issues.

230

00:21:53.220 --> 00:21:53.940

Jenna Turner: So we.

231

00:21:54.030 --> 00:21:57.120

Jenna Turner: We did not collect that data, but actually it's interesting.

232

00:21:57.120 --> 00:22:05.910

Jenna Turner: You mentioned that I just started rolling out in the project manager turn your APP that we just rolled out two or three crews that anytime there's a tree falls out is there.

233

00:22:06.780 --> 00:22:19.140

Jenna Turner: smart phone take a picture records the species word was in a branch or was it a whole tree didn't have any defects are going to be able to gather more information about what kind of.

234

00:22:19.170 --> 00:22:20.430

Jenna Turner: trees are causing power.

235

00:22:20.430 --> 00:22:21.870

Jenna Turner: outages during different kinds of.

236

00:22:21.870 --> 00:22:22.860

Jenna Turner: Events because.

237

00:22:23.730 --> 00:22:25.080

Jenna Turner: During the summer and all the leaves.

238

00:22:25.080 --> 00:22:29.370

Jenna Turner: On the trees, we have different impacts, then in the middle of the winter, when we get heavy wet.

239

00:22:29.370 --> 00:22:31.260

Jenna Turner: snow on the pine trees, or the dead.

240

00:22:31.260 --> 00:22:39.060

Jenna Turner: ashtrays, and so it really varies, and we are just justice need when we add a new APP to collect more data on.

241

00:22:40.500 --> 00:22:44.790

Jenna Turner: use that data to drive our management decision about what kind of company.

242

00:22:45.870 --> 00:22:54.480

Kevin Magee: Right that's good to hear I said, some of the stuff I see our trees coming from something from private property, with all the work you do a lot of its.

243

00:22:54.600 --> 00:22:57.240

Kevin Magee: ends up from private property on to these wires.

244

00:22:57.630 --> 00:23:01.770

Jenna Turner: Oh absolutely I mean we live in such a heavily forested state and.

245

00:23:02.460 --> 00:23:16.140

Jenna Turner: You know, we only maintain, if you look here about eight feet around the wires and give them an 80 foot tall oak tree that falls 20 back and we're selling big triangle and so that's that is a good way in you know we start by kind of.

246

00:23:16.170 --> 00:23:17.610

12035354956: keep things clear in zones.

247

00:23:17.970 --> 00:23:22.500

Jenna Turner: 30 manner, but there is a lot more that could be done, working with private property owners to.

248

00:23:25.980 --> 00:23:38.790

Jenna Turner: And then i'm going to stay on the call when we talk about high street I know that's coming up in your agenda a little bit more than that, I can turn it back to you and I stand through that I do have a five o'clock that.

249

00:23:40.260 --> 00:23:40.920

should be fine.

250

00:23:42.840 --> 00:23:45.360

Kevin Magee: Okay, he got his teeth things up to.

251

00:23:46.830 --> 00:23:57.660

Kevin Magee: we'll just jump into one was skipped over the tree planting because that's going to be tied into high street after we finish talking about anyways so we just move right into the high street Dom.

252

00:23:59.400 --> 00:24:00.540

Kevin Magee: tree work with them looking.

253

00:24:00.540 --> 00:24:00.870

12035354956: At.

254

00:24:01.830 --> 00:24:02.730

Kevin Magee: A couple weeks ago with my.

255

00:24:03.060 --> 00:24:09.810

Kevin Magee: I looked at the property with jenna and actually john also stopped by and also walk the area with us.

256

00:24:11.340 --> 00:24:12.360

Kevin Magee: We identified.

257

00:24:13.500 --> 00:24:20.700

Kevin Magee: let's see 11234 by about five trees.

258

00:24:21.900 --> 00:24:22.440

Kevin Magee: To be.

259

00:24:22.950 --> 00:24:25.290

Kevin Magee: removed on high street these around the.

260

00:24:26.490 --> 00:24:29.280

Kevin Magee: side, the road or to be the north side of the road there.

261

00:24:30.720 --> 00:24:34.380

Kevin Magee: Looked at 17 high street with three trees.

262

00:24:35.400 --> 00:24:48.630

Kevin Magee: being removed one on the right side the driveway the left side the driveway and then sort of the left side the property, these are pretty much growing right up in through the wires and very integral into the wires there.

263

00:24:49.800 --> 00:24:53.310

Kevin Magee: 23 high street was another one with the.

264

00:24:54.930 --> 00:24:56.070

Kevin Magee: left side of the House.

265

00:24:56.340 --> 00:25:09.570

Kevin Magee: A tree being removed there it's through the wires and twice on high street on the right side the driveway was another tree identified to be removed, and I believe this one here we've actually showed decay and other.

266

00:25:10.740 --> 00:25:11.910

Kevin Magee: Problems with it there.

267

00:25:13.410 --> 00:25:19.800

Kevin Magee: So we did identify those and also jenna indicated to kind of provide more information, but.

268

00:25:20.910 --> 00:25:23.250

Kevin Magee: Some trimming around those wires.

269

00:25:23.520 --> 00:25:34.260

Kevin Magee: Some of the trees, which are growing under the wires they don't have the heavy leaders going through the wires like these other five trees do so those could be.

270

00:25:36.030 --> 00:25:39.690

Kevin Magee: trimmed back in spirit, at this point in time.

271

00:25:41.550 --> 00:25:44.370

Kevin Magee: jenna john you won't have any thing else in.

272

00:25:45.570 --> 00:25:49.530

Sydney Cunningham: I was just going to lunch Yvonne Yvonne it's Norway maple.

273

00:25:49.590 --> 00:25:50.820

Sydney Cunningham: And Linden down on.

274

00:25:50.820 --> 00:25:51.480

12035354956: High Street.

275

00:25:52.110 --> 00:25:55.890

Sydney Cunningham: yeah they're all and those are underneath the wires.

276

00:25:57.840 --> 00:26:09.990

Sydney Cunningham: No yeah so what Kevin said any of the trees have probably could come down probably shouldn't come down if jenna thinks that they they could be pruned in either B or C to be open.

277

00:26:10.710 --> 00:26:23.700

Sydney Cunningham: terrific couple of the residents came out and talk to us, they like the trees in the street, but the street is really over

planet, so I think they'll like it better when it's a little bit lighter yeah yeah.

278

00:26:24.600 --> 00:26:25.890

Shavaun Towers: Okay, thanks yeah.

279

00:26:26.370 --> 00:26:34.140

Jenna Turner: And and, from my perspective, the trees are so overgrown and and are in direct contact with the energized and Dr which is not insulated.

280

00:26:34.740 --> 00:26:47.490

Jenna Turner: it's really a safety concern i'm surprised there haven't been more liability issues, there were Kevin and I did is we looked at every single tree individually to see if it could be proved without having major structural leaders.

281

00:26:48.870 --> 00:26:52.020

Jenna Turner: If a main leader was in contact or within a.

282

00:26:52.020 --> 00:26:52.410

12035354956: foot.

283

00:26:52.500 --> 00:26:53.640

Jenna Turner: Of the primary.

284

00:26:54.510 --> 00:27:09.630

Jenna Turner: We decided to remove those trees, there are several that don't have a main leader that close to the primary that can be proven they'll have they'll sort of be on indeed out a little around the primary and so.

285

00:27:10.140 --> 00:27:16.680

Jenna Turner: that's what we looked at every single tree looking at how they would need to be important, I do need to set up.

286

00:27:16.740 --> 00:27:18.690

Jenna Turner: Anything outage.

287

00:27:18.720 --> 00:27:24.960

Jenna Turner: Because we can't do a lot of our on so that will delay us probably into.

288

00:27:26.400 --> 00:27:29.580

Jenna Turner: You know, like intentionally turn the power of the second.

289

00:27:29.580 --> 00:27:30.090

Jenna Turner: invoice.

290

00:27:30.180 --> 00:27:34.950

Jenna Turner: During the cold weather, and so we will have to find a power outage to do that work.

291

00:27:36.210 --> 00:27:48.930

Jenna Turner: and working with Kevin doing all the planning posting the trees and then getting an outage so you can do both at swimming no removals have you done with the power on just because of how overhaul.

292

00:27:51.210 --> 00:27:57.660

Jenna Turner: And I did I did tell Kevin I think that I around arbor day to plant one tree from every source.

293

00:27:59.430 --> 00:28:05.340

Jenna Turner: And that's something that I could offer to any residents that are upset about DC.

294

00:28:08.550 --> 00:28:13.650

Kevin Magee: yeah that probably work for the House buy that property where there's three pretty trees coming out we.

295

00:28:13.800 --> 00:28:15.510

Kevin Magee: Put one back in and hopefully.

296

00:28:16.800 --> 00:28:21.960

Kevin Magee: keep them happy in the people on the street happy and it provides a new generation of trees.

297

00:28:22.020 --> 00:28:22.500

12035354956: As.

298

00:28:22.620 --> 00:28:24.540

Kevin Magee: The other is even if we vm now.

299

00:28:24.990 --> 00:28:34.200

Kevin Magee: May in the future, need to be taken out maybe in the future so start some new generation of trees and hopefully the retreats for that location.

300

00:28:40.470 --> 00:28:44.100

Kevin Magee: So anybody any questions any concerns.

301

00:28:50.280 --> 00:28:51.390

Shavaun Towers: sounds like a plan.

302

00:28:52.350 --> 00:28:58.890

Kevin Magee: Okay well keep going forward with that and then we'll work also with, on the other side of the road where.

303

00:28:59.940 --> 00:29:06.270

Kevin Magee: there's some low branches and stuff from the south side of the road to get those on limbed up.

304

00:29:08.460 --> 00:29:11.790

Kevin Magee: And we always have one tree, on the other side which we've been talking about getting.

305

00:29:11.790 --> 00:29:12.270

removed.

306

00:29:13.440 --> 00:29:18.870

Kevin Magee: john was there any other trees, on the other side of the road outside the wire is that need to be thinned out also.

307

00:29:18.870 --> 00:29:20.160

12035354956: For these.

308

00:29:20.460 --> 00:29:21.390

Kevin Magee: For more like.

309

00:29:21.810 --> 00:29:24.120

Kevin Magee: you're talking about before with the tunnel effect in there.

310

00:29:24.780 --> 00:29:29.370

Sydney Cunningham: Kevin I would really work on the wire side of the street, before I move to the other side.

311

00:29:30.150 --> 00:29:31.380
Sydney Cunningham: Okay, I think the.

312
00:29:31.470 --> 00:29:32.880
12035354956: The only tree that I could say is.

313
00:29:32.880 --> 00:29:34.080
12035354956: That one tree.

314
00:29:34.710 --> 00:29:37.770
Sydney Cunningham: you're taking down a tree that's flagged the tree now.

315
00:29:37.980 --> 00:29:40.380
Sydney Cunningham: We should we talked about the tree next to that.

316
00:29:40.560 --> 00:29:45.570
Sydney Cunningham: is really in decline, I don't even know if it's going to leave out this year that might be another one, you might want to consider taking down.

317
00:29:46.380 --> 00:29:52.200
Kevin Magee: Okay yeah i'll do the one in front of 36 high and then that one also wanna yeah whether improves their.

318
00:29:55.980 --> 00:29:59.850
Kevin Magee: Okay, so let's plan to work forward on that one there then.

319
00:30:03.090 --> 00:30:08.010
Kevin Magee: Does anybody have any questions for jenna about anything whatever source their.

320
00:30:09.630 --> 00:30:16.920
Kevin Magee: opportunity now, since we she's graciously given us some time to go through their program and.

321
00:30:18.480 --> 00:30:23.610
Kevin Magee: sister with this project here on high street and she's been a big help with other.

322
00:30:25.200 --> 00:30:34.320
Kevin Magee: road projects and talent we've been dealing with with dead trees along the wires and stuff they are big one, we just did was on county road last.

323

00:30:36.660 --> 00:30:37.950

Kevin Magee: summer I believe it was.

324

00:30:39.150 --> 00:30:42.900

Kevin Magee: So, maintaining hopefully good partnership with them.

325

00:30:44.190 --> 00:30:56.970

Jenna Turner: You think I will say all my contact information is on the last slide of the PowerPoint that Kevin has so myself my email, if you think of any questions or anything comes up throughout the year don't hesitate to reach out to me.

326

00:30:58.290 --> 00:30:58.800

Sydney Cunningham: Like agenda.

327

00:30:59.640 --> 00:31:02.310

Shavaun Towers: and good luck with the APP that sounds terrific.

328

00:31:02.790 --> 00:31:07.980

Jenna Turner: i'm very excited about it, we just rolled it out to about 400 tree cruise is.

329

00:31:08.190 --> 00:31:09.570

Shavaun Towers: Oh wow that's a.

330

00:31:09.720 --> 00:31:12.150

Jenna Turner: lot of fun in the project manager.

331

00:31:12.150 --> 00:31:15.720

Jenna Turner: i'm not really an IT person i'm a tree person, but.

332

00:31:15.810 --> 00:31:22.740

Jenna Turner: we've got it figured out so it'll be fun to get that data and see what kind of trends we have coming from the valid.

333

00:31:24.120 --> 00:31:24.390

Jenna Turner: well.

334

00:31:24.780 --> 00:31:25.140

Jenna Turner: I think.

335

00:31:26.220 --> 00:31:27.930

Shavaun Towers: Next year, you can give us an update.

336

00:31:28.470 --> 00:31:29.910

Jenna Turner: Absolutely, and I say that's something.

337

00:31:29.910 --> 00:31:31.740

Jenna Turner: I can absolutely share share with.

338

00:31:31.770 --> 00:31:32.340

Jenna Turner: Kevin.

339

00:31:32.730 --> 00:31:34.050

Jenna Turner: And i'm sure there'll be.

340

00:31:34.050 --> 00:31:35.520

Jenna Turner: Some interesting findings from it.

341

00:31:36.960 --> 00:31:42.330

Jenna Turner: All right, with that i'm going to sign off if anyone has any questions for me Kevin has all my contact information.

342

00:31:42.720 --> 00:31:45.570

Kevin Magee: Great Thank you jenna cover years into a PDF and send it to.

343

00:31:45.570 --> 00:31:46.860

12035354956: Everybody perfect.

344

00:31:46.890 --> 00:31:47.970

Jenna Turner: All right, thank you.

345

00:31:48.330 --> 00:31:50.460

Caroline Herrick: you're welcome to you.

346

00:31:57.060 --> 00:31:58.290

Kevin Magee: So the.

347

00:31:59.850 --> 00:32:01.020

Kevin Magee: ties us into.

348

00:32:02.640 --> 00:32:07.110

Kevin Magee: tree planting program for this year does anybody have anything you want to hold off.

349

00:32:08.940 --> 00:32:10.470

Kevin Magee: A month until we get surely back.

350

00:32:11.310 --> 00:32:12.240

Sydney Cunningham: What do we do that Kevin.

351

00:32:13.200 --> 00:32:15.180

Dottie: And I just asked a question about.

352

00:32:15.180 --> 00:32:17.220

Dottie: It, though, in anticipation.

353

00:32:18.750 --> 00:32:23.250

Dottie: I am going to try to submit for a grant again this.

354

00:32:23.250 --> 00:32:27.090

Dottie: year and the grants.

355

00:32:28.320 --> 00:32:43.020

Dottie: has to be in by March 11, so I do need the complete information of what the plans are for the spring planting and then the decision will be made at the beginning of June.

356

00:32:45.090 --> 00:32:47.190

Dottie: Whether we get it or not, I don't know it's.

357

00:32:47.190 --> 00:32:48.750

Dottie: been kind of tricky with.

358

00:32:48.750 --> 00:32:55.680

Dottie: The coronavirus needs, etc, but i'm hoping with the different.

359

00:32:56.820 --> 00:32:59.610

Dottie: outlook about our environment, now that.

360

00:33:00.270 --> 00:33:07.470

Dottie: it's becoming more active in a we're that hopefully they'll give us give us some more money so.

361

00:33:09.330 --> 00:33:10.680

Dottie: If we can't do that to.

362

00:33:11.010 --> 00:33:11.820

Day.

363

00:33:14.310 --> 00:33:19.350

Dottie: i'm hoping that we can settle that in time for the submission of.

364

00:33:20.760 --> 00:33:21.570

Dottie: For the grant.

365

00:33:22.800 --> 00:33:24.660

Kevin Magee: They said that's march 11 is a new day.

366

00:33:25.080 --> 00:33:25.620

yeah.

367

00:33:32.130 --> 00:33:32.700

Kevin Magee: yeah.

368

00:33:34.110 --> 00:33:37.350

Kevin Magee: Do we have a rough idea we want trees yeah.

369

00:33:38.580 --> 00:33:44.280

Dottie: Well, you did go over some trees last meeting I have 64 fair 47 fair.

370

00:33:44.280 --> 00:33:45.630

Dottie: 53 broad.

371

00:33:48.810 --> 00:33:55.920

Dottie: At to state than a few general statements on state street route one.

372

00:33:57.120 --> 00:33:58.230

Dottie: From the town hall.

373

00:33:58.770 --> 00:34:00.090

Sydney Cunningham: Having Can I make a suggestion.

374

00:34:01.050 --> 00:34:01.710

Kevin Magee: Come for john.

375

00:34:03.330 --> 00:34:11.190

Sydney Cunningham: Why don't we to move the move the funding for it, why don't we say we're going to plant eight new trees okay.

376

00:34:11.610 --> 00:34:15.750

Sydney Cunningham: Most of which i'm sure sure vaughn and I can find locations for eight new trees.

377

00:34:15.810 --> 00:34:17.520

Shavaun Towers: And quite sure we can do that.

378

00:34:17.820 --> 00:34:19.920

Sydney Cunningham: Again, so we, and we could say if.

379

00:34:19.950 --> 00:34:22.590

Sydney Cunningham: each tree has a \$500 value to it.

380

00:34:23.100 --> 00:34:24.150

Sydney Cunningham: That leaves that.

381

00:34:24.300 --> 00:34:25.530

12035354956: And I think that's plenty.

382

00:34:25.830 --> 00:34:33.690

Sydney Cunningham: And then we could move towards the funding and go from there, we don't have to go into specifics that it's going to be on you know 53 broad street.

383

00:34:33.780 --> 00:34:35.190

Dottie: Okay, great.

384

00:34:35.610 --> 00:34:36.270

Dottie: Great yeah.

385

00:34:36.300 --> 00:34:38.250

Dottie: eight new trees to be determined.

386

00:34:38.550 --> 00:34:40.980
Kevin Magee: yeah and when it comes.

387
00:34:41.640 --> 00:34:50.070
Shavaun Towers: To say within the damn near the near the Center of town or within several blocks of of the green or something like that.

388
00:34:59.070 --> 00:34:59.670
Thank you.

389
00:35:07.980 --> 00:35:14.100
Kevin Magee: Right one thing what at here, so you guys information yesterday regarding a.

390
00:35:15.750 --> 00:35:17.040
Kevin Magee: Property at the.

391
00:35:18.150 --> 00:35:22.380
Kevin Magee: intersection of summer which field, and what we feel street.

392
00:35:25.650 --> 00:35:27.540
Kevin Magee: They are looking their connors are looking at.

393
00:35:28.710 --> 00:35:33.870
Kevin Magee: doing some tree planting along their common property line with the.

394
00:35:35.100 --> 00:35:46.680
Kevin Magee: town of guilford here and there, on the call here with their landscape architect and landscaper believe last stuff I got it right.

395
00:35:49.170 --> 00:35:50.160
12035354956: If you guys want to.

396
00:35:51.270 --> 00:35:52.680
Kevin Magee: jump in here, I can.

397
00:35:54.480 --> 00:35:55.740
Kevin Magee: give a brief update here and.

398
00:35:56.070 --> 00:35:56.700
A brief.

399

00:35:57.780 --> 00:36:03.810

Kevin Magee: Indication we'll wait to do there I can at the latest map that you sent over I can pop up on the screen there.

400

00:36:05.400 --> 00:36:07.830

12035354956: yeah that would probably be easiest Kevin I think.

401

00:36:10.800 --> 00:36:14.490

SFields: So a little bit of, if I may say backstory.

402

00:36:14.610 --> 00:36:15.030

SFields: I.

403

00:36:15.240 --> 00:36:27.870

SFields: went out and met with the client and drew up a landscape plan for them and, unfortunately, had the one of the property lines incorrectly mapped out on my drawing specifically along Whitfield street.

404

00:36:29.550 --> 00:36:35.790

SFields: So that's what the new line will show on here, which obviously indicates the plantings are running right through the Center of it.

405

00:36:38.490 --> 00:36:40.830

Kevin Magee: All right does everybody see on the screen.

406

00:36:43.230 --> 00:36:44.010

Kevin Magee: All right, let me.

407

00:36:46.590 --> 00:36:47.220

12035354956: Try this again.

408

00:36:54.540 --> 00:36:54.780

Kevin Magee: Okay.

409

00:36:57.240 --> 00:36:57.870

Kevin Magee: Nice.

410

00:37:02.910 --> 00:37:14.160

Kevin Magee: So there's their property Whitfield street or new Whitfield street is on the top well with us on the bottom and then to the left here is the summer street.

411

00:37:16.680 --> 00:37:19.890

Kevin Magee: We looked at this property a couple years ago and they pointed to.

412

00:37:21.120 --> 00:37:26.040

Kevin Magee: palm trees on the sides here, and then we planted the look.

413

00:37:27.240 --> 00:37:33.030

Kevin Magee: On the front corner of the property there which will street side so okay continue.

414

00:37:35.280 --> 00:37:36.660

SFields: I don't know if the homeowner wants to.

415

00:37:36.660 --> 00:37:37.170

speak.

416

00:37:39.300 --> 00:37:50.580

12035354956: So um you know we can't contacted sued to the rear of the House, as it points to new Whitfield street there's really no privacy.

417

00:37:52.020 --> 00:37:56.070

12035354956: In fact, if you look, you know to just to the right of where the Porches.

418

00:37:58.320 --> 00:38:07.770

12035354956: that's our kitchen and you know we we often wave to people as they walk by as we're washing dishes or anything because there's just nothing in there, to prevent.

419

00:38:09.630 --> 00:38:12.150

12035354956: Anyone from really just looking into into the House.

420

00:38:13.440 --> 00:38:15.090

12035354956: And so we wanted to set up.

421

00:38:16.740 --> 00:38:19.590

12035354956: A natural sort of privacy screen.

422

00:38:21.180 --> 00:38:40.890

12035354956: You know, we sort of thought about having trees there, but I, you know from our perspective that doesn't really provide the type of screen that we're looking for, and we really don't like the idea of putting up a you know, a wood fence or another fence, because we think that you know planting.

423

00:38:42.180 --> 00:38:48.870

12035354956: You know, a green privacy screen is more in line with the rest of our House that's next door to us.

424

00:38:49.350 --> 00:39:03.180

12035354956: And that you can cross summer street and go up along with tilts toward the bridge and over the railroad tracks that's also sort of agreed and privacy screen and we're just trying to keep it sort of in line with what's already in in the in the area.

425

00:39:05.190 --> 00:39:13.110

12035354956: That we tried to push it out a little beyond the property line due to the closeness of where the leads field is, which is.

426

00:39:14.220 --> 00:39:25.350

12035354956: It runs along the property line about 10 feet from there, so we wanted to try and get a few extra feet to sort of minimize the risk that any growth would would.

427

00:39:25.800 --> 00:39:40.590

12035354956: transition into the leach field into that mantle system that they put into distribute the waist and then also to try and keep along the line of the two existing trees and not extend beyond that but sort of move it inside.

428

00:39:41.820 --> 00:39:44.400

12035354956: along that that line between those trees.

429

00:39:45.870 --> 00:40:04.020

12035354956: The other plants, the other two trees, the summer street side or along the property line and the third tree on though the old Whitfield side um is just off the property line and onto the right away, and so I can't remember what kind of tree, that is, but.

430

00:40:04.620 --> 00:40:05.130

SFields: It was a.

431

00:40:06.150 --> 00:40:06.750

SFields: safe.

432

00:40:06.810 --> 00:40:08.340

SFields: laboratory a single a lot.

433

00:40:11.730 --> 00:40:16.710

12035354956: So that was that was really the thought process was to try and balance the.

434

00:40:18.060 --> 00:40:31.650

12035354956: The desire for some privacy with trying to maintain it as a more of a Green, as opposed to offense and to minimize the the potential running of the system into the beach area.

435

00:40:38.520 --> 00:40:43.350

Kevin Magee: Okay, everybody know, I was talking to my show the plans to town engineer census has worked within the right away.

436

00:40:44.520 --> 00:40:45.330

Kevin Magee: and

437

00:40:45.360 --> 00:40:58.320

Kevin Magee: she's against having any sort of screening type barriers within the town right away, they can be planted just inside the property line, but our body and those type of plantings.

438

00:40:59.730 --> 00:41:01.230

Kevin Magee: are discouraged or.

439

00:41:02.310 --> 00:41:07.230

Kevin Magee: not wanted within the town right away for road purposes drainage.

440

00:41:08.490 --> 00:41:13.110

Kevin Magee: She is okay, with some street trees within that area, but not.

441

00:41:15.420 --> 00:41:16.800

Kevin Magee: trees, which create a.

442

00:41:18.840 --> 00:41:20.730

Kevin Magee: visual property line.

443

00:41:21.240 --> 00:41:29.940

Kevin Magee: status area which basically makes people Homeowners or future homers believe that they own more land, then the they actually have.

444

00:41:31.500 --> 00:41:33.660

Kevin Magee: So i'll have to pull the.

445

00:41:34.170 --> 00:41:36.300

12035354956: Is our providers in closer.

446

00:41:36.330 --> 00:41:38.400

Kevin Magee: To the septic system there.

447

00:41:39.630 --> 00:41:41.280

Sydney Cunningham: Susan john cutting him.

448

00:41:41.460 --> 00:41:42.690

SFields: hi john how you doing.

449

00:41:42.810 --> 00:41:43.410

Sydney Cunningham: Good how you doing.

450

00:41:43.650 --> 00:41:44.250

12035354956: Good.

451

00:41:44.640 --> 00:41:47.700

Sydney Cunningham: what's the dimension from the edge of the sidewalk.

452

00:41:47.730 --> 00:41:48.570

Sydney Cunningham: To the property line.

453

00:41:49.770 --> 00:41:52.050

SFields: And the edge of Do you know what.

454

00:41:52.170 --> 00:41:52.890

I also.

455

00:41:55.440 --> 00:41:56.220

Kevin Magee: 19 feet.

456

00:41:57.150 --> 00:42:00.180

12035354956: yeah it's about 19 feet it's far.

457

00:42:01.380 --> 00:42:04.170

SFields: It seems, and I think that's where I had my.

458

00:42:04.260 --> 00:42:05.580

12035354956: visual deception.

459

00:42:05.790 --> 00:42:19.080

SFields: is because of that right next door there their head row is about it's on it's on the sidewalk line, so I thought Oh, these two trees must indicate, and I did not have this lovely like larger plan I got yesterday.

460

00:42:20.610 --> 00:42:26.100

SFields: So I made the assumption that based on that tree going along the side of the property line that those are on the property line and then.

461

00:42:26.100 --> 00:42:26.910

SFields: These two other.

462

00:42:27.120 --> 00:42:28.290

SFields: I guess town trees.

463

00:42:28.680 --> 00:42:31.920

SFields: I made it a misconception, but what we are trying to do is kind of.

464

00:42:31.920 --> 00:42:32.760

12035354956: Create that.

465

00:42:33.720 --> 00:42:35.640

SFields: barrier like i'm saying without.

466

00:42:37.530 --> 00:42:41.340

SFields: Encouraging encroaching too far on the septic field and feeling, it was the top of the homeowner as well.

467

00:42:42.480 --> 00:42:53.610

12035354956: Right and the other thing was to to not you know, to keep it far enough in that we didn't block the view at the STOP sign of summer street in new Whitfield street and we made sure to keep those.

468

00:42:53.610 --> 00:43:08.040

SFields: plantings actually at that corner substantially lower than the arbor variety, so that you had a much larger it's just a small perennial bed with some dwarf Japanese holly's so no matter what you had a view across with no improvement of vision of traffic.

469

00:43:08.550 --> 00:43:14.040

Sydney Cunningham: Well, I think janice town engineering y'all for there's going to tell you that either of those.

470

00:43:14.610 --> 00:43:26.460

Sydney Cunningham: Either on summer street if they're leaving they're going to need approximately 300 feet of visual clearance down from the row when a car is stopped there she.

471

00:43:27.600 --> 00:43:29.610

SFields: said 300 feet back.

472

00:43:29.670 --> 00:43:30.360

12035354956: both ways.

473

00:43:30.510 --> 00:43:32.400

Sydney Cunningham: So they're going to look up over the bridge.

474

00:43:32.730 --> 00:43:34.800

Sydney Cunningham: And down towards the Center of Guilford.

475

00:43:35.310 --> 00:43:37.770

Sydney Cunningham: So if the sidewalk takes up.

476

00:43:37.770 --> 00:43:40.680

Sydney Cunningham: Five feet from wrote edge okay.

477

00:43:41.820 --> 00:43:50.700

Sydney Cunningham: The Center of the green giants that you're proposing and a green giant just so everyone realizes is a form of Barber variety, but it is.

478

00:43:50.940 --> 00:43:51.720

12035354956: Probably the.

479

00:43:51.750 --> 00:43:53.580
Sydney Cunningham: biggest grower in the.

480
00:43:53.610 --> 00:43:56.490
SFields: fastest hour I don't know that it's the biggest but it's definitely the fastest.

481
00:43:56.490 --> 00:43:57.210
Sydney Cunningham: Growing it's.

482
00:43:57.420 --> 00:44:01.140
Sydney Cunningham: it's probably 50 feet of maturity by 10 to 12 feet wide.

483
00:44:02.790 --> 00:44:12.000
Sydney Cunningham: So I think the plan is fine, I just think the placement of some of the material, you want to make sure that the Center of those green giants.

484
00:44:13.140 --> 00:44:18.930
Sydney Cunningham: Realistically, is probably six to seven feet off the edge of the sidewalk.

485
00:44:20.670 --> 00:44:31.590
12035354956: Right, so that if you look at where the line is between the two existing trees that's about nine see I believe or eight feet from the sidewalk.

486
00:44:34.020 --> 00:44:34.800
12035354956: yeah that's.

487
00:44:35.820 --> 00:44:36.120
12035354956: Because.

488
00:44:36.450 --> 00:44:44.490
Sydney Cunningham: I think that I think the last thing you would want to do is have a piece of material 10 1215 years from now.

489
00:44:46.320 --> 00:45:00.480
Sydney Cunningham: grows onto the sidewalk I bought my house and guilt for 25 years ago and I never took the privet out that was in front of it, it was mistakenly planted about 18 to 24 inches from edges sidewalk it constantly has to be maintained.

490

00:45:00.510 --> 00:45:01.830
12035354956: back off the sidewalk.

491

00:45:02.190 --> 00:45:02.790
Sydney Cunningham: And the green.

492

00:45:02.850 --> 00:45:04.740
Sydney Cunningham: line is a much larger growing.

493

00:45:06.480 --> 00:45:07.440
Sydney Cunningham: So, yes.

494

00:45:08.130 --> 00:45:10.950
SFields: It looks like it's the property line is.

495

00:45:14.700 --> 00:45:16.050
Kevin Magee: The sidewalk in but.

496

00:45:16.050 --> 00:45:16.500
12035354956: it's the.

497

00:45:16.830 --> 00:45:19.050
Kevin Magee: Yes, and the road itself is.

498

00:45:27.600 --> 00:45:33.180
SFields: mean this up the property line is 20 feet in from the edge of the sidewalk.

499

00:45:34.950 --> 00:45:36.780
12035354956: Right, according to the plan that I received from the.

500

00:45:36.780 --> 00:45:37.590
SFields: Town yesterday.

501

00:45:37.890 --> 00:45:38.520
Kevin Magee: Right yep.

502

00:45:39.150 --> 00:45:40.920
12035354956: Right it's it's twice that's.

503

00:45:41.520 --> 00:45:42.690
SFields: Far more than nine are.

504

00:45:43.380 --> 00:45:46.350
Kevin Magee: You, the road another 25 another five feet off of that to.

505

00:45:46.350 --> 00:45:47.070
Kevin Magee: The edge of the road.

506

00:45:47.160 --> 00:45:48.780
SFields: Yes, you have 25 feet from the.

507

00:45:48.780 --> 00:45:49.830
SFields: Property line to the edge of the road.

508

00:45:50.400 --> 00:45:53.340
Kevin Magee: But he said, the town engineers that can allow any this within that.

509

00:45:53.610 --> 00:45:55.590
SFields: I understand that I don't go telling.

510

00:45:56.220 --> 00:45:57.840
Kevin Magee: john here when john know that.

511

00:45:58.230 --> 00:45:58.830
Sydney Cunningham: Either you're.

512

00:45:58.860 --> 00:46:00.810
Kevin Magee: Good thoughts there there's not going to be.

513

00:46:01.440 --> 00:46:02.280
Kevin Magee: allowed within that.

514

00:46:02.460 --> 00:46:04.350
Sydney Cunningham: within that area okay.

515

00:46:05.160 --> 00:46:08.430
Shavaun Towers: So if I just interpretive Susan it's Sharon.

516

00:46:08.790 --> 00:46:09.630

SFields: hi Sharon.

517

00:46:10.110 --> 00:46:11.400

Shavaun Towers: hi it's been a while.

518

00:46:13.980 --> 00:46:19.410

Shavaun Towers: proposing that this plan just be essentially pulled towards the House further.

519

00:46:19.470 --> 00:46:19.830

Shavaun Towers: To.

520

00:46:19.860 --> 00:46:20.760

Shavaun Towers: get it off the.

521

00:46:20.820 --> 00:46:30.330

SFields: Word away that's when the homeowner counters and iris discussing that earlier if that's an option we're just a little nervous about the septic system and I.

522

00:46:30.930 --> 00:46:39.750

SFields: know that everybody can obviously reach out for a while now that it seems I have john and john here, what are your thoughts on it being that close to the septic it'll be 10 feet off of that.

523

00:46:40.890 --> 00:46:44.520

Sydney Cunningham: I don't think the green giant root system would be a problem with the septic 10 feet oh.

524

00:46:45.060 --> 00:46:46.050

Shavaun Towers: yeah I don't.

525

00:46:46.500 --> 00:46:49.320

Shavaun Towers: Think there it's a relatively small assistant.

526

00:46:49.530 --> 00:46:50.670

SFields: yeah Yes, they.

527

00:46:51.780 --> 00:46:53.040

12035354956: Impact yeah.

528

00:46:53.700 --> 00:46:56.880

Shavaun Towers: I don't think it will be a problem with the system.

529

00:46:58.290 --> 00:47:00.180

12035354956: I wanted someone else to encourage.

530

00:47:00.690 --> 00:47:01.530

SFields: Say that loud is one.

531

00:47:03.060 --> 00:47:12.210

12035354956: that's comforting for us as well, because that was our primary concern was you know and doing some preliminary research before we even started this was.

532

00:47:12.720 --> 00:47:25.290

12035354956: You know what is the you know what's the impact what's the potential impact to the septic and the last thing I want to do is is have any damage that I mean that's just problems for us and problems for the neighbors that are you know.

533

00:47:26.700 --> 00:47:27.090

12035354956: If.

534

00:47:27.750 --> 00:47:31.110

Shavaun Towers: If you were proposing willow we would all have a problem.

535

00:47:32.850 --> 00:47:37.620

12035354956: My parents had a kid I would never ever in my life plan to willow tree.

536

00:47:38.640 --> 00:47:39.660

Shavaun Towers: yeah you're right.

537

00:47:39.660 --> 00:47:42.120

12035354956: They were throwing into the basement through the concrete.

538

00:47:48.240 --> 00:47:48.600

SFields: So.

539

00:47:49.170 --> 00:47:54.630

Sydney Cunningham: Susan I read through your plant list are you are you guys thinking of removing the two plums.

540

00:47:56.490 --> 00:48:13.650

SFields: I in the future, it would be i'm not a fan I don't think it's honestly a long live tree, you should look straggly over time, that it is not part of this existing plan, but I did recommend that in the future it will be nice to change those out to other Greens buyers to the client i'm.

541

00:48:15.210 --> 00:48:18.840

SFields: Not alone live tree, but if you want, you can match it I don't know if you can see it at the bottom there.

542

00:48:20.460 --> 00:48:21.000

Shavaun Towers: mm hmm.

543

00:48:21.300 --> 00:48:22.680

SFields: My little note I just I.

544

00:48:22.740 --> 00:48:23.700

SFields: Just I don't have seen.

545

00:48:23.730 --> 00:48:25.050

12035354956: great success with them.

546

00:48:25.680 --> 00:48:25.980

yeah.

547

00:48:28.980 --> 00:48:29.310

Sydney Cunningham: Just.

548

00:48:29.370 --> 00:48:30.900

Sydney Cunningham: Just from a design standpoint.

549

00:48:30.900 --> 00:48:32.400

Sydney Cunningham: I would think that would be terrific.

550

00:48:32.490 --> 00:48:36.300

Sydney Cunningham: On summer street to have four of the same trees.

551

00:48:36.870 --> 00:48:38.160

SFields: Oh, I agree, I agree.

552

00:48:38.160 --> 00:48:39.330

SFields: And that's why we noted that.

553

00:48:39.330 --> 00:48:40.050
12035354956: For the client.

554

00:48:40.110 --> 00:48:47.100
SFields: um but I don't know that as a cost, they want to encourage this time and I would not recommend planting to the tree that's already there.

555

00:48:49.410 --> 00:48:49.920
Kevin Magee: there's.

556

00:48:51.090 --> 00:49:04.560
Kevin Magee: there's go through the Minutes from that meeting, back in 2017 or whatever and, basically, I remember this, all the notes are Sharon and john both indicated that's had is it had its issues, but the property owner at that time already bought the trees.

557

00:49:07.170 --> 00:49:08.700
12035354956: The red leaf pulled them in.

558

00:49:08.730 --> 00:49:09.600
SFields: that's what happens.

559

00:49:14.880 --> 00:49:26.160
Shavaun Towers: Well, if I have to say, the twilio would be a lovely scale for that street and a better tree, but I understand that you know it's a lot to bite off at once.

560

00:49:28.830 --> 00:49:30.090
SFields: And Lisa not every other.

561

00:49:34.170 --> 00:49:34.770
12035354956: yeah right.

562

00:49:35.850 --> 00:49:39.960
12035354956: yeah yeah those that's that's you know phase two at some point in the future.

563

00:49:41.640 --> 00:49:42.360
We understand.

564

00:49:46.590 --> 00:49:48.660
12035354956: And Kevin is there any issue with.

565
00:49:49.710 --> 00:49:51.390
12035354956: The one on Whitfield street.

566
00:49:53.370 --> 00:49:58.950
Kevin Magee: Now that one I don't see an issue just off the edge of the property line there like I said it's not really.

567
00:49:58.980 --> 00:50:00.690
Kevin Magee: considered like a border.

568
00:50:00.720 --> 00:50:02.190
Kevin Magee: Type thing as the.

569
00:50:02.670 --> 00:50:07.050
Kevin Magee: river, it is it's a considerable like more of a street train that position there.

570
00:50:07.830 --> 00:50:09.060
12035354956: Okay okay.

571
00:50:14.160 --> 00:50:15.780
Kevin Magee: yeah I did a septic problems.

572
00:50:15.810 --> 00:50:19.050
Kevin Magee: are actually on the summer street side here believe there's a young.

573
00:50:19.650 --> 00:50:20.850
Kevin Magee: infiltration says three.

574
00:50:20.850 --> 00:50:22.260
12035354956: Is yeah.

575
00:50:22.530 --> 00:50:25.650
12035354956: Outside water drink yeah and that's why the.

576
00:50:25.980 --> 00:50:27.120
12035354956: property owner asked to have.

577

00:50:27.120 --> 00:50:27.450

It.

578

00:50:28.740 --> 00:50:34.230

Kevin Magee: Along the common property line or shut pushed a little bit into the town property for those plum trees there.

579

00:50:46.620 --> 00:50:47.820

12035354956: OK OK.

580

00:50:48.390 --> 00:50:49.860

Shavaun Towers: I think the only thing I would.

581

00:50:49.860 --> 00:50:50.460

Shavaun Towers: say is.

582

00:50:50.550 --> 00:50:51.300

Shavaun Towers: When I moved to.

583

00:50:51.840 --> 00:50:53.280

Shavaun Towers: The arbor varieties.

584

00:50:54.780 --> 00:50:55.860

Shavaun Towers: I would look.

585

00:50:55.950 --> 00:51:00.690

Shavaun Towers: At their placement relative to the ultimate canopy on the.

586

00:51:00.720 --> 00:51:01.440

SFields: oaks.

587

00:51:01.710 --> 00:51:02.880

SFields: I think it was in.

588

00:51:03.240 --> 00:51:04.410

Shavaun Towers: A braun you've got some.

589

00:51:04.440 --> 00:51:06.660

12035354956: cons I man, I understand from a.

590

00:51:06.690 --> 00:51:08.250

Shavaun Towers: Privacy standpoint, why.

591

00:51:09.420 --> 00:51:11.910

Shavaun Towers: But neither tree is going to be very happy.

592

00:51:13.830 --> 00:51:15.360

Shavaun Towers: In the future, is it strong.

593

00:51:15.450 --> 00:51:17.670

SFields: Right, I tried to pull them in from a bit.

594

00:51:17.700 --> 00:51:22.770

SFields: And we get up to pull them in and tear more, but I understand what you're saying, because I know they'll just meeting.

595

00:51:23.820 --> 00:51:24.090

Shavaun Towers: yeah.

596

00:51:25.710 --> 00:51:28.890

Kevin Magee: there'd be a lower class height are providing that would.

597

00:51:29.970 --> 00:51:32.910

Kevin Magee: be able to start that section before you go into the other.

598

00:51:33.240 --> 00:51:42.480

SFields: So we actually had some Japanese holly's I can get give them a sense of privacy, people will still be able to peek in but something that would get that middle height, we also had some.

599

00:51:43.590 --> 00:51:51.900

SFields: tree hydrangea forum, so he may not be as winter interest, but it would do we're trying to work, make it work so that it wasn't a full green wall.

600

00:51:51.930 --> 00:51:53.130

12035354956: I guess what's the point and keep it.

601

00:51:53.130 --> 00:51:54.930

12035354956: Lower as you got to the edges of the truth.

602

00:51:55.380 --> 00:51:56.400
Shavaun Towers: I think that.

603
00:51:56.460 --> 00:51:57.690
Shavaun Towers: would be effective and.

604
00:51:57.690 --> 00:51:58.110
12035354956: I think.

605
00:51:58.590 --> 00:51:59.910
Maintaining.

606
00:52:01.170 --> 00:52:03.720
Shavaun Towers: The well having the diversity.

607
00:52:04.860 --> 00:52:11.100
Shavaun Towers: I don't really think is is going to impede your sense of privacy and enclosure it won't be a green.

608
00:52:12.960 --> 00:52:23.310
12035354956: area yeah that areas, not the one that you know, primarily concerned it's really you know the porch and off the kitchen where you know we have to wait a lot.

609
00:52:24.420 --> 00:52:24.780
12035354956: Yes.

610
00:52:28.380 --> 00:52:29.460
Shavaun Towers: It doesn't help you if.

611
00:52:29.790 --> 00:52:30.330
SFields: They are looking at.

612
00:52:31.890 --> 00:52:32.820
12035354956: It yeah yeah.

613
00:52:35.430 --> 00:52:35.670
12035354956: yeah.

614
00:52:36.390 --> 00:52:37.350
it's a great spot.

615

00:52:38.580 --> 00:52:43.770

12035354956: Yes, oh, it must have been dying to get you know this project underway.

616

00:52:45.750 --> 00:52:47.130

Kathy: You needed to stop snowing.

617

00:52:48.360 --> 00:52:48.750

12035354956: yeah.

618

00:52:50.760 --> 00:52:52.260

12035354956: But at least we won't be in a drought.

619

00:52:54.150 --> 00:52:56.430

12035354956: At least at the start of the spring right.

620

00:53:02.490 --> 00:53:07.440

12035354956: Okay, so then if we just pull them in it and you want us to resubmit this Kevin or.

621

00:53:10.020 --> 00:53:14.670

Kevin Magee: Do this show me a copy, so we know when you do start planting that you do have a.

622

00:53:15.810 --> 00:53:18.330

Kevin Magee: plan that works within your side, the property there.

623

00:53:19.410 --> 00:53:20.730

12035354956: I could try that up no problem.

624

00:53:21.390 --> 00:53:23.040

Kevin Magee: We just want to go back to the group here, but just.

625

00:53:23.040 --> 00:53:25.020

Kevin Magee: For myself, and the time engineer to.

626

00:53:25.830 --> 00:53:27.390

Kevin Magee: know what know what's going on there.

627

00:53:28.770 --> 00:53:30.360

12035354956: When you want to move forward with the.

628

00:53:30.360 --> 00:53:32.400

Kevin Magee: stuff on summer street, let us know we can.

629

00:53:33.570 --> 00:53:35.010

Kevin Magee: evaluate those trees.

630

00:53:36.810 --> 00:53:39.720

Kevin Magee: For that that planting when you get close to that point in time.

631

00:53:40.740 --> 00:53:41.880

12035354956: Okay, great Thank you.

632

00:53:44.280 --> 00:53:45.210

SFields: Thank you very much.

633

00:53:45.420 --> 00:53:46.170

Sydney Cunningham: All right, take care.

634

00:53:46.860 --> 00:53:47.340

Shavaun Towers: Good to see.

635

00:53:47.490 --> 00:53:49.170

SFields: You good to see all of you it's been too.

636

00:53:49.170 --> 00:53:49.740

12035354956: Long.

637

00:53:50.310 --> 00:53:51.270

SFields: I miss you all.

638

00:53:55.170 --> 00:53:55.980

Thank you.

639

00:53:57.390 --> 00:53:58.680

12035354956: bye bye.

640

00:54:01.980 --> 00:54:02.490

Kevin Magee: Our.

641

00:54:03.810 --> 00:54:07.440

Kevin Magee: Next, we have is the tree policy.

642

00:54:08.700 --> 00:54:10.290

Shavaun Towers: i'm working on it.

643

00:54:10.650 --> 00:54:12.720

Kevin Magee: that's all right, I know that feeling.

644

00:54:13.260 --> 00:54:22.950

Shavaun Towers: Well yeah I also sort of hadn't anticipated this mid series meetings so i'll have i'll try to have something for the next one.

645

00:54:25.770 --> 00:54:31.860

Kevin Magee: There with me was pretty much set up for the meeting with ever source, but then we just had a couple other things pop in here so.

646

00:54:35.190 --> 00:54:41.790

Kevin Magee: And then nothing new on the tree great I just kind of put my report together to send into the gaffer foundation.

647

00:54:43.590 --> 00:54:46.500

Kevin Magee: telling them what we did on that project so far.

648

00:54:51.210 --> 00:54:56.010

Kevin Magee: So I got I think that's all we have on our agenda and actually we're.

649

00:54:56.490 --> 00:54:56.730

You know.

650

00:54:58.650 --> 00:55:01.230

Kathy: We have a quorum, we need to go back and approve the Minutes.

651

00:55:03.270 --> 00:55:04.380

Sydney Cunningham: Kathy right on it.

652

00:55:06.720 --> 00:55:08.820

Sydney Cunningham: Until it's all done there might be some.

653

00:55:10.710 --> 00:55:12.720

Shavaun Towers: I wasn't I was the one holding you up.

654

00:55:16.770 --> 00:55:18.810

Kevin Magee: This your moves do have a second.

655

00:55:19.680 --> 00:55:20.190

Second.

656

00:55:21.480 --> 00:55:22.140

Kevin Magee: All in favor.

657

00:55:22.800 --> 00:55:23.070

Aye.

658

00:55:24.300 --> 00:55:38.400

Kevin Magee: And then one other piece of business, we have a bill from Kathy \$415 and 38 cents for the work for the last month's meetings do have a motion to approve.

659

00:55:39.570 --> 00:55:41.730

Caroline Herrick: A certain road right.

660

00:55:41.910 --> 00:55:43.410

Kevin Magee: Caroline do a second.

661

00:55:45.570 --> 00:55:45.780

Shavaun Towers: A.

662

00:55:45.810 --> 00:55:48.240

Kevin Magee: Second, I survived all a favor.

663

00:55:48.780 --> 00:55:49.350

I.

664

00:55:50.940 --> 00:55:57.990

Kevin Magee: All right, um does anybody else have anything for other business or any other business that we need to discuss.

665

00:55:59.250 --> 00:56:01.860

Kathy: We want to set a date for the next meeting or.

666

00:56:02.190 --> 00:56:02.850
Yes.

667
00:56:04.020 --> 00:56:04.410
Kevin Magee: let's go.

668
00:56:07.980 --> 00:56:09.270
Kathy: Maybe April or May.

669
00:56:10.410 --> 00:56:21.180
Kevin Magee: And we still get that we should have something probably end of March, beginning of April spring to decide on trees to order for how to do a spring planting.

670
00:56:21.450 --> 00:56:37.140
Sydney Cunningham: I would go it just me, I would go April, you get into may you're not going to get new trees will probably June or July so i'd make make a motion to if we're looking for a new trees, we can find the locations and let's have a meeting what third week of April Kathy.

671
00:56:39.270 --> 00:56:41.160
Shavaun Towers: Are you going to be able to find trees like.

672
00:56:41.640 --> 00:56:49.440
Kevin Magee: I do i'm wondering if we need to go if we need this go a month away the end of March, here or first week or so of April.

673
00:56:51.450 --> 00:57:01.770
Sydney Cunningham: siobhan I think you can find from inventory any of the different farms on you know the sizes we're planning a two inch caliper are readily.

674
00:57:02.760 --> 00:57:14.370
Sydney Cunningham: garden, they were not as big custom trees coming out in New Jersey, I think you can find whatever we decide, we want to use and if it's a variety that gets changed from inventory, we just make a motion to move from.

675
00:57:15.480 --> 00:57:17.550
Sydney Cunningham: One Linden to something else.

676
00:57:18.660 --> 00:57:29.280

Kevin Magee: yeah Okay, so what are you looking there john do you want the young, they said, we can do, and a march would be their usual week we like the 25th of March.

677

00:57:29.910 --> 00:57:32.610

Sydney Cunningham: Whatever whatever everyone else thinks is fine with me.

678

00:57:33.600 --> 00:57:46.890

Kevin Magee: I hate to be behind a game with three is kind of last year, this past year they didn't order minus and they really they weren't quick because, with a pandemic, they didn't ship as much in Britain not realizing people were doing work with my is my understanding.

679

00:57:47.160 --> 00:57:54.420

Sydney Cunningham: I was just I was just mentioning I wouldn't wait till May and the March is fine with me if you want to go to the beginning, whatever the board wants to do.

680

00:57:54.900 --> 00:57:59.400

Kathy: i'm gonna meet the fourth weekend marks instead of the third, and that makes it the 25th so.

681

00:58:01.080 --> 00:58:03.690

Sydney Cunningham: yeah if you guys want it that's.

682

00:58:05.790 --> 00:58:06.750

Shavaun Towers: fine by me.

683

00:58:15.360 --> 00:58:15.780

More.

684

00:58:18.900 --> 00:58:19.260

Kevin Magee: Okay.

685

00:58:23.220 --> 00:58:24.810

Kevin Magee: Any other business say we think of.

686

00:58:28.050 --> 00:58:29.400

Kevin Magee: All the main business now Kathy.

687

00:58:30.510 --> 00:58:33.090

Kathy: yeah got the important thing done pay the bills.

688

00:58:36.420 --> 00:58:37.110

Kevin Magee: Every.

689

00:58:37.530 --> 00:58:40.980

Sydney Cunningham: emotion to plus yep i'll make a motion to adjourn.

690

00:58:41.580 --> 00:58:42.390

Kevin Magee: Okay john.

691

00:58:43.380 --> 00:58:45.240

Kevin Magee: Second, second.

692

00:58:46.950 --> 00:58:47.700

Kevin Magee: All in favor.

693

00:58:48.330 --> 00:58:48.810

Shavaun Towers: Aye.

694

00:58:49.470 --> 00:58:50.970

Shavaun Towers: already see everyone.

695

00:58:51.570 --> 00:58:52.740

Dottie: If you see you to.

696

00:58:53.400 --> 00:58:54.180

Sydney Cunningham: Take care everyone.

697

00:58:58.290 --> 00:58:59.760

Kathy: will have to track down surely.

698

00:59:01.650 --> 00:59:02.190

Dottie: By.

699

00:59:02.970 --> 00:59:04.830

Kevin Magee: Tomorrow, but going if there's a voicemail from her.

700

00:59:07.440 --> 00:59:09.270

Shavaun Towers: hey Thank you all bye bye.

701

00:59:10.170 --> 00:59:10.500
bye.
